‘Psihofest’ – 1st festival of popular psychology was held on April 9th 2011 at Faculty of Humanities and Social Science, as a public event aimed to promote and popularize scientific-based knowledge of human behavior. Its organizers were students and professors of the Department of Psychology, University of Zagreb. The event was sponsored by Školska knjiga Ltd.

‘Psihofest’ featured a variety of science-related activities – from lectures, exhibitions, workshops, and poster sections, to live demonstration of psychology experiments. Topics covered most parts of psychological science: both in fundamental (cognitive, biological, developmental, and social psychology) and applied fields (clinical, organizational, and educational psychology). Program was designed to offer something for everyone: activities for children and school groups, adults looking for stimulating and entertaining hand-on knowledge, or professionals interested in specific research.

Manifestation received a lot of publicity in the local media and attracted more than 1000 visitors. Inspired by their satisfaction and high evaluations of the program themes and organization, we are looking forward to our next ‘Psihofest’.
