

JOURNAL OF GEODETIC SCIENCE

Novi geodetski časopis *Journal of Geodetic Science* (*JGS*) počeo je izlaziti 2011. godine. Namijenjen je objavljivanju rezultata istraživanja u teorijskoj i primjenjenoj geodeziji. Navedena su ova područja: fizikalna, matematička i satelitska geodezija, GNSS, satelitska geodezija i gravimetrija, deformacijska analiza, geodetske mreže, inženjerska geodezija, planetarna geodezija, geodinamika.

Izdavač časopisa je *Versita* u suradnji s *Royal Institute of Technology (KTH)*, Stockholm. *Versita* je osnovana 2002. godine sa zadaćom objavljivanja rezultata znanstvenih istraživanja u središnjoj i istočnoj Europi. Njezin izdavački program uključuje i objavljivanje knjiga i časopisa s otvorenim pristupom (*Versita Open*). *Versita Open* danas uključuje oko 200 časopisa s otvorenim pristupom i drugi je najveći izdavač te vrste literature na svijetu.

Predviđeno je da *JGS* godišnje izlazi u četiri broja. Do danas (listopad 2011) objavljena su prva tri broja. Na mrežnim stranicama časopisa (<http://versita.com/jgs/>) preko natuknice *Read* dostupni su cijeloviti tekstovi svih do sada objavljenih članaka. Stranice sadrže i vrlo detaljne upute autorima (*Submit*).

Radi ilustracije tematike koja se u časopisu objavljuje izdvajao sam iz svakog od prva tri broja po jedan članak.
