

## Letters to the Editorial Board

### *Dear editors!*

First, please accept my apologies for not responding by January 11, 2004. I am a few days late, largely because of other time conflicts and my failure to immediately open your message. I hope you will be able to accept my instructions a few days late. There are only 6 modest errors which could be easily corrected and would greatly improve the manuscript. Please let me know whether my late submission of these corrections could be used before your journal deadlines. Here are the corrections:

1. On page 212, left column, lines 7 to 8, please change the wording from "... mean estimate statistic of rhythm ..." to "... midline estimating statistic of rhythm...".
2. On page 212, right column, line 22, please change "In decreasing the order of magnitude ..." into "In decreasing order of magnitude...".
3. On the page 213, line 22, the beginning of the second paragraph "Training and circadian BP overswinging" should be italicised. It is the beginning of a new topic.
4. In the References, the item Borer 2002 is now published. Therefore the "(in press)" should be changed to "15, 827-830".

5. At the very end of the article, under "Correspondence to:", there are two errors. Please change "Department of Kinesiology" to "Division of Kinesiology".
6. In the same Correspondence section, the fax number is incorrect. Please change to 647-1925 to 936-1925.

That is all. I hope you receive it in time to make the changes. Please kindly let me know whether the changes could be done on time.

Sve najbolje u novoj godini Vama i Vasim kolegama zeli

Professor Katarina T. Borer, Ph.D.  
Division of Kinesiology, University of Michigan  
401 Washtenaw, Ann Arbor,

### *Comment of the Editorial board:*

Unfortunately, the letter reached us when the KINESIOLOGY, 35 (2), 2003, was already in print. Nothing could be done to make the necessary corrections and the article appeared with six, really modest, errors.

Therefore, we would like to apologise to Prof. Katarina T. Borer and her co-authors, as well as to our readers for that oversight.
