

EDITORIAL POLICY

All papers submitted to Food Technology and Biotechnology are handled according to the [Code of Conduct and Best Practice Guidelines for Journal Editors and Code of Conduct for Journal Publishers](#). Before submission, authors should read the [Journal's Instructions to authors](#). Authors are encouraged to read the [European Association of Science Editors guidelines](#). For the research on humans or animals, the authors are advised to follow the recommendations of the [International Committee of Medical Journal Editors](#).

PEER REVIEW

All contributions are evaluated according to the criteria of originality and quality of their scientific content. All manuscripts are first assessed by the Editor-in-Chief and can be rejected without reviewing if not considered of sufficient interest or novelty, too preliminary or out of scope of the Journal. If the manuscript is considered suitable for further evaluation, it is first sent to the Field editor. Based on his/her opinion the paper is then sent to at least two reviewers. The revised version is evaluated by the Field editor and/or reviewers and the Editor-in-Chief brings a decision about final acceptance based on their suggestions. If necessary, further revision can be asked for to fulfil all the requirements of the reviewers. Before acceptance for publication, each manuscript is run through iThenticate plagiarism detection software to verify the originality and ensure the quality of the written work. Before printing, a linguistic, metrological and technical revision is made, at which stage the authors are asked to make the final corrections. The final version is then sent to the printer's office and the authors receive the galley proof for final check before printing. After printing, all manuscripts are posted online as pdf files in the final form, indexed in databases and deposited in CrossRef with the assigned doi numbers.

CONFIDENTIALITY

Editors handle all papers submitted to Food Technology and Biotechnology in strict confidence. With the exception of reviewers, they do not disclose any information regarding the submissions to third parties, unless in case of a suspected misconduct, where [COPE](#) recommendations are followed.

The reviewers are also required to treat the submitted papers confidentially and not to share or distribute the results presented in the papers which they receive for evaluation to third parties. They are encouraged to point out a case of suspected misconduct, but they should act in a confidential manner. The reviewers can also recommend a particular course of action in their confidential comments to the editor, who will then make a decision based on their recommendations, following [Code of Conduct and Best Practice Guidelines for Journal Editors and Code of Conduct for Journal Publishers](#).

Food Technology and Biotechnology conducts a single blind review, i.e. the names of the reviewers are confidential to ensure critical evaluation of the work. The reviewers are asked not to disclose their names or contact details in the comments intended for authors.

CORRECTION OF DATA

All authors should account for the accuracy of the published data. Correction of data should be done before the final printing of the paper. For that reason, the corresponding author receives the galley proof of the paper and is asked to correct it carefully and in timely manner (within 48 h) before publication. If authors find a major mistake or error in the published version of the article, an **Erratum** will be published in the first available issue and posted online.

RETRACTION OF PUBLISHED PAPERS

If the authors made an honest error or discover the major flaws in their work, they can retract the paper. The online version will then be marked as '**retracted by authors**' and a retraction notice will be added to the CrossRef database. All links to the retracted article will be maintained.

If the editors, reviewers or readers notice a case of duplicate or overlapping publication, fraudulent use of data, plagiarism or unethical research, the paper will be, after an internal review by the editor, retracted, in which case the online version will then be marked as '**retracted by editor**' and a retraction notice will be added to the CrossRef database. All links to the retracted article will be maintained. All retractions will be done in accordance with the **COPE** retraction guidelines.

ETHICAL CONSIDERATIONS

Conflict of interest

Authors should declare any conflict of interest in the cover letter and in the paper, and at a later stage of the process in the statement of Conflict of Interest. When suggesting reviewers, they should pay attention to the fact that the proposal of their colleagues, collaborators or members of their institutions **will not be considered** during reviewing. Also, the authors should state if they want to **exclude** a particular reviewer, which will be accepted if the reasons are justifiable. After the acceptance of the paper for publication all authors are obliged to sign the Declaration of Authorship and Statement of Conflict of Interest forms.

According to Journal's policy, manuscripts are **never** sent to reviewers from the same institution or (if possible) country as the authors. The **reviewers should notify the editors** on any conflict of interest which prevents them from reviewing the paper, such as: recent or ongoing collaborations with the authors, inclusion during the preparation of the paper, direct competition, direct dispute with the authors, financial interest, any political, moral, ideological or similar dilemma.

If members of the Editorial or Advisory Board or their close collaborators appear as authors submitting to the journal, they are then **excluded** from the entire process of evaluation. The reviewers are then chosen in a way to minimize possible bias during the evaluation process. During revision, the editors follow the [Code of Conduct and Best Practice Guidelines for Journal Editors and Code of Conduct for Journal Publishers](#).

Research involving human subjects, animals or plants

If the research involves humans or animals, authors are advised to follow the recommendations of the [International Committee of Medical Journal Editors](#).

For all tested human subjects, authors should have their **informed consent** to participate in the study. For subjects under the age of 18, their parents or guardians should give the **permission** for their participation in the study. If the participant has died, then consent for publication must be sought from the next of kin of the participant. **All documentation** must be made available on editor's request, and will be treated confidentially. For all tested subjects, a **statement** detailing compliance with relevant guidelines and/or appropriate permissions or licences must be included in the manuscript.

Research on vertebrates or regulated invertebrates, field studies and other non-experimental research on animals must comply with institutional, national or international guidelines and, where possible, should be approved by an **ethics committee**. A **statement** detailing compliance with relevant guidelines and/or appropriate permissions or licences must be included in the manuscript.

Experimental research on plants (either cultivated or wild) including collection of plant material, must comply with institutional, national, or international guidelines. Field studies should be conducted in accordance with local legislation, and the manuscript should include a **statement** specifying the appropriate permissions and/or licences.

PUBLICATION MISCONDUCT

The Journal follows the [Code of Conduct and Best Practice Guidelines for Journal Editors and Code of Conduct for Journal Publishers](#). Researchers, reviewers, readers or editors of other journals are encouraged to

contact the Editorial Office (ftb@pbf.hr) in case of a suspected misconduct, such as: redundant or duplicate submission, plagiarism, self-plagiarism, text recycling, breaching ethical norms, etc.

Authors bear the sole responsibility for the content of the contribution and all submissions should be accompanied with the signed cover letter in which they declare that they have not violated any internal rules or regulations of their institutions related to the content of the contributions and that they have not submitted the paper somewhere else.

Before acceptance for publication, each manuscript is run through iThenticate plagiarism detection software to verify the originality and ensure the quality of the written work. Authors should take care not to exceed the limit of **20 %** of overlapping (no more than **3 %** with one source, which must be cited), and even less in the Results and Discussion section, otherwise the paper will be rejected. If these terms are violated, **COPE** recommendations will be followed and all parties involved will be **notified**.

COPYRIGHT

Food Technology and Biotechnology applies the [Creative Commons Attribution 4.0 CC BY](#) license to all published papers, which permits use, distribution and reproduction in any medium, provided the original work is properly cited and is not used for commercial purposes. Copyright of published papers is retained by the authors, who grant the Faculty of Food Technology and Biotechnology, University of Zagreb, Croatia, a license to publish the manuscript as the original publisher. Authors also grant any third party the right to use the article freely and for non-commercial purposes, as long as its integrity is maintained and its original authors, citation details and publisher are clearly stated. Individual users may access, download, copy, display, adapt and translate the manuscripts published in *Food Technology and Biotechnology*, provided that the authors' intellectual and moral rights, reputation and integrity are not compromised. It is the obligation of the user to ensure that any reuse complies with the copyright policies of the owners. If the content of the published manuscripts is copied, downloaded or otherwise reused for non-commercial research and educational purposes, a link to the appropriate bibliographic citation (authors, journal title, manuscript title, volume, year and page numbers, and the link to the published version on the Journal's website www.ftb.com.hr) should be provided. Copyright notices and disclaimers must not be deleted. For any unofficial translation of the manuscript, a statement that it is an unofficial translation of the article must accompany the text.
