Author Guidelines

Guidelines for manuscript is adopted to the IEEE Templates for Transactions.

All papers must be written in English. Introductory discussion should be kept at a minimum, and material published elsewhere should be referenced rather than reproduced or paraphrased. Authors should strive for maximum clarity of expression, bearing in mind that the purpose of publication is the dissemination of technical knowledge and that an excessively complex or poorly written presentation can only obscure the significance of the work described.

Care should be taken in the organization of the paper, such that a logical and consistent progression of thought is evident. It is strongly suggested that theorems, derivations, calculations, and other elements of a paper which are not essential to the continuity of the text be placed in Appendices. Authors with language difficulties should, whenever possible, obtain the assistance of a colleague fluent in English before submitting a manuscript for publication.

Equations, formulas, figures and tables must be numbered and referred within the text. References should be numbered in order of occurrence and referred to in the text by bracketed numbers. The list of references must be typed on the separate sheet(s) and ordered consecutively. Each reference item should include the author(s) name(s), article title, journal/proceedings/book name, volume and issue number, pages, month and year, publisher.

If a manuscript is accepted for publication, the author will be asked to supply the final copy electronically. Instructions for submitting an accepted and finalized paper in electronic form will be provided to the author together with the letter of acceptance.
