[For Librarians](#)

All references to publications in the text should be presented in a list of references. The manuscripts should be carefully checked to ensure that the spelling of the authors' names and dates are exactly the same in the text as in the reference list. In the text refer to the author's name or to original source and year of publication, followed – if necessary – by a short reference to appropriate pages. If reference is made in the text to publications written by more than two authors the name of the first author should be used, followed by «et al.». This indication, however, should never be used in the list of references. In this list names of authors and coauthors with initials should be mentioned instead. The list of references should be arranged alphabetically on authors' names, and chronologically per author.

The following format should be used for the reference list:

- (a) for periodicals Jurković, I. and Durn, G. (1988): Deposits in the Zrin District of Trgovska Gora in Croatia. *Geol. vjesnik*, 41, 327-339, Zagreb.
- (b) for proceedings of conferences, symposia, etc. Durn, G., et al. (2002): Geochemical and Mineralogical Assessment of Lime Stabilized Waste from Petroleum Industry in Croatia, ASME Engineering Technology Conference on Energy, February 4-6, P. 9., Houston.
- (c) for books Wilson, J. L. (1975): Carbonate facies in geologic history. Springer, 471 pp, Berlin.
- (d) for multi-author books Stonesipher, S. A. (1978): Chemistry of deep-sea philipsite, clinoptilolite, and host sediments. In: Sand, L. B. and Mumpton, F. A. (editors): Natural zeolites, Pergamon, 221-234 pp., Oxford.

All references where DOI is available need to have it visible, after the end of entry ( - 'dot' DOI).

References, if it is needed, are separated into following subtitles - published papers (books), internet sources and/or from professional archives.

## Tables and Figures

Tables and figures should be sent at the end of DOC file as text (tables) and imported (figures) bitmaps (.jpg, .tiff ...). The position of figure or table in the text should be signed (*eg. Position of Figure 1./Table 1.*). Number figures and tables in Arabic numerals. Avoid numbering individual figures as Fig. 11a. and Fig 11b. Instead, make them Fig. 11 and Fig. 12. Figures and photos prepared for paper can be black-white or color. Be sure to send clear, high-resolution figures and photos, because they could be reduced in size and formatted in two-columns text. If you would like to keep original size of your figure propose it (*eg. Position of Figure 1 in original size*).

Figures are named in the following style:

**Figure 1:** Here comes the caption (only 1 sentence is used)

**Figure 2:** This is caption of Figure 2. Note difference (2 or more sentences are used).

Tables are named in the same way.

When paper is accepted, final text with imported tables and figures at the end is submitted as DOC. Simultaneously, the figures are sent also as set of bitmaps in resolution of 300 dpi.

## Units

The use of SI metric units is obligatory.

## Miscellaneous

Footnotes should be used if absolutely essential. In most cases it should be possible to incorporate them in the normal text. When the citations, figures or tables are mentioned in text, they need to be bolded like **Jurković and Durn (1988), Figures 5, Tables 2.**

These instructions are intended to aid you in preparing your manuscript to be considered for publication in The Mining-Geology-Petroleum Engineering Bulletin. Failure to follow these guidelines could result in your manuscript being returned to you for further revision.
