

darling of the pragmatists. The pragmatic movement philosophically was an American phenomenon but practically it is world extended. Its main concern is the man as agent and his activity (»Men are what they do«). The pragmatic thinkers say: the facts, reality, action are prior and they determinate our knowledge.

There is a great disagreement among the philosophers about the primacy of theory or practice. No one of conflicting streams in its extrem position can be right. Theorizing in itself is in fact one activity, and a very human practice is impossible without theoretic reflexion. Only theory and practice together are an »actus humanus«. The complete man is a thinking and active animal.

Our appreciation of theory and practice is manysided and objective. Rather than reflecting in categories of antinomy, contrast, opposition and exclusivity we must think about theory and practice as a couple-concept of human being in complementarity, harmony and synthesis.

## PONOVO PISMO MAJCI

Stanislava Adamić

Dugo Ti ne pisah  
Oprosti mati  
Svako me slovo  
svaka riječ boli  
Usprkos svemu  
ti znaš  
da i šutnja voli —  
Oprosti mati.

Što da ti kažem?  
Srce pjeva  
i viče  
Do tebe mi je  
tisuću pakla  
čistilišta — što li  
do Tebe  
ili tvog neba proći  
Ja sam majko  
još prepuna tvojih nježnosti  
tvoje nježnosti željna  
da bi čudo  
I mislim  
samo čudo moglo  
u čudo preobraziti noći.
