

Činjenica da su mnogi sudionici plaćali cijenu predviđenu za one koji nisu članovi Hrvatskoga stomatološkog društva izazvala je među organizatorima tečaja čuđenje.

Nema, naime, logičnog objašnjenja da sudionici tečaja plaćaju 300 kuna kada s članarinom od 150 kuna za članstvo u Hrvatskome liječničkom zboru automatski su postali članovi Hrvatskoga stomatološkog društva. Ta im članarina također osigurava da besplatno sudjeluju na jednom tečaju koji odredi rukovodstvo Društva, a za istu članarinu dobivaju i 4 broja časopisa *Acta Stomatologica Croatica*. Što se tiče bodova, tom članarinom dobiva se u godini 2 boda za primitak časopisa, i do 5 bodova za predloženi tečaj.

Sudionicima su predstavljeni svi bitni aspekti suvremene dentalne implantologije. Sudjelovanje najmlađih suradnika u nastavi i mladih nastavnika s dvaju Zavoda za oralnu kirurgiju (jednog u sklopu Stomatološke klinike u Gundulićevoj 5 i drugi u sklopu Kliničke bolnice "Dubrava") omogućilo je hrvatskoj stomatološkoj publici da se upozna s budućim nositeljima struke i znanosti u oralnoj kirurgiji.

Čini se da su predavači uložili ozbiljan trud, vrijeme i suvremenu računalnu opremu da bi sudionicima na suvremen način prikazali problematiku dentalne kirurgije, a prikazom vlastite kazuistike nastojali pokazati gdje se naša oralna kirurgija nalazi u tome kontekstu. Novi je naraštaj oralnih kirurga bio diskretno uzbuđen, što znači da je odgovorno prihvatilo povjerenje mu zadaće. Dostojno je i profesionalno predstavio struku, pa se uz uvjet takva pristupa i u dnevnom nastavnim, kliničkim, stručnim i znanstvenom radu može očekivati njegov daljnji razvoj.

Planirajući sljedeće godine održati tečaj s nekom drugom katedrom Stomatološkog fakulteta u Zagrebu, pozivamo sve one koji do danas nisu postali članovima Hrvatskoga stomatološkog društva da to učine.

NEWS IN DENTAL MEDICINE VI

Oral surgery, Dental Implantation Today

This year, in accordance with the tradition of meetings held every year in November under the title News in Dental Medicine, the Croatian Association of Dental Medicine held a free course for its members under the title *Dental Implantation Today*.

The course was held in Zagreb on 19 November, 1999, on the 16th Floor of the Intercontinental Hotel, in the romantic atmosphere of a snow storm, for approximately 230 participants. All teachers from the Department of Oral Surgery, School of Dental Medicine in Zagreb took part in the course, apart from Prof. Pavel Kobler, who, according to a decision of the National Council of the University of Zagreb, headed the Committee for Evaluation of Programmes of Dental Study of the School of Dental Medicine, University of Rijeka.

The organisers of the course were amazed to see that numerous participants paid the fee as non-members of the Cro-

atian Dental Association. Namely, there is no logical explanation for the fact that these participants paid 300 kuna for participation, when payment of 150 kuna for membership of the Croatian Medical Association automatically ensures membership of the Croatian Dental Association. Membership also enables free participation at one course, organised by the Association, and for the same membership fee 4 numbers of the journal *Acta Stomatologica Croatia* are received. With regard to points for the membership fee, members receive 2 points a year for receiving the journal and up to 5 points for the proposed course.

During the course participants were shown all essential aspects of contemporary dental implantation. Participation of the youngest teaching collaborators and young lecturers/teachers from two Departments of Oral Surgery (the Department in the Dental Clinic at No.5, Gundulić St. and the Department in the Clinical Hospital "Dubrava") made it possible for the Croatian dental public to meet the future carriers of the profession and science in the field of oral surgery.

The lecturers invested serious effort, time and modern computer equipment in order to demonstrate the problems of dental surgery to participants of the course, and by showing their own casuistics they endeavoured to show the position of our oral surgery in this context. The new generation of oral surgeons showed discreet excitement and responsible acceptance of the task entrusted to them. They presented dental medicine in a professional and dignified manner. Thus, such an approach in their daily teaching, clinical, professional and scientific work is an indication of further progress in the future.

A similar course is planned for next year with another Department from the School of Dental Medicine in Zagreb. We therefore invite all those who have still not become members of the Croatian Dental Association to do so.

SPOMEN NA POVIJEST ORGANIZIRANOGA DJELOVANJA HRVATSKIH STOMATOLOGA

Dne 20. prosinca 1999. navršilo se je 96 godina od dana kada je godine 1903. osnovano Zadruga hrvatskih stomatologa. Približavajući se stoljetnome jubileju organiziranoga djelovanja hrvatskih stomatologa, Hrvatsko stomatološko društvo Hrvatskoga liječničkog zbora podsjeća stomatologe na taj važan događaj, nastao kao posljedica sazrijevanja svijesti o potrebi da se nekolicina tadašnjih liječnika zubara, školovanih u inozemstvu, udruže u stručnim udrugama kojima su mogli sigurnije nastupati u društvu i zastupati svoje interese.

Na 95. obljetnicu upravni odbor Hrvatskoga stomatološkog društva, koji čine prof. Goran Knežević - predsjednik, dr. Vesna Barac Furtinger - zamjenica, dr. Vladimir Bratolić - blagajnik i dr. Siniša Varga - tajnik, zajedno s prof. Zvonimirovom Kaićem, posjetio je grob prvoga predsjednika Zadruga dr. Eugena Radoa i cvijećem okitio njegov grob. (Slike

ATTRIBUTE TO THE HISTORY OF THE ORGANISED ACTIVITY OF CROATIAN DENTISTS

The 20th December 1999 marked the 96th year since the founding of the "Croatian Dental Society" in 1903. On the threshold of the hundredth anniversary of the organised activity of Croatian dentists the Croatian Dental Society of the Croatian Medical Association recall this important event, which occurred because a number of dentists at that time, educated abroad, were conscious of the need to form professional societies, to ensure safer work in society and to protect their interests.

On the 95th anniversary the Board of Directors of the Croatian Dental Society, which comprises Prof. Goran Knežević - President, Dr. Vesna Barac Furtinger - Vice-President, Dr. Vladimir Bratolić - Treasurer and Dr. Siniša Varga - Secretary, together with Prof. Zvonimir Kaić, visited the grave of the first President of the Society, Dr. Eugene Rado, and placed flowers on his grave (Figs. 1,2 & 3). On that occasion Prof. Kaić referred to the work of Dr. Eugene Rado and recalled the importance of past events (Fig. 4). We take this opportunity of reminding our readers of those events.
