2006**

## CONTENTS

### ORIGINAL SCIENTIFIC PAPERS

<b>Paula M. Periago, Raquel Conesa, Begoña Delgado, Pablo S. Fernández and Alfredo Palop</b> <i>Bacillus megaterium</i> Spore Germination and Growth Inhibition by a Treatment Combining Heat with Natural Antimicrobials . . . . . (1)	17
<b>Jin-Shui Wang, Mou-Ming Zhao, Xiao-Quan Yang and Yue-Ming Jiang</b> Improvement of Emulsifying Properties of Wheat Gluten Hydrolysate/ $\lambda$ -Carrageenan Conjugates (1)	25
<b>Irena Usajewicz and Beata Nalepa</b> Survival of <i>Escherichia coli</i> O157:H7 in Milk Exposed to High Temperatures and High Pressure . . (1)	33
<b>Zi-Tao Jiang, Rong Li and Jimmy C. Yu</b> Pungent Components from Thioglucosides in <i>Armoracia rusticana</i> Grown in China, Obtained by Enzymatic Hydrolysis . . . . . (1)	41
<b>Adriane B. P. Medeiros, Ashok Pandey, Luciana P. S. Vandenberghe, Gláucia M. Pastore and Carlos R. Soccol</b> Production and Recovery of Aroma Compounds Produced by Solid-State Fermentation Using Different Adsorbents . . . . . (1)	47
<b>Marcin Skowronek and Jan Fiedurek</b> Purification and Properties of Extracellular Endoinulase from <i>Aspergillus niger</i> 20 OSM. . . . . (1)	53
<b>Wei-Guo Zhang and Xiang-Yang Ge</b> Improvement of Fructanohydrolase Production in <i>Aspergillus niger</i> SL-09 by Sucrose Ester. . . . . (1)	59
<b>Tomaz Polak, Lea Gašperlin, Alenka Rajar and Božidar Žlender</b> Influence of Genotype Lines, Age at Slaughter and Sexes on the Composition of Rabbit Meat. . . (1)	65
<b>Milan Čertík, Lucia Sláviková, Silvia Masrnová and Ján Šajbidor</b> Enhancement of Nutritional Value of Cereals with $\gamma$ -Linolenic Acid by Fungal Solid-State Fermentations . . . . . (1)	75
<b>Cuitlahuac Aranda, Armando Robledo, Octavio Loera, Juan C. Contreras-Esquivel, Raul Rodríguez and Cristóbal Noé Aguilar</b> Fungal Invertase Expression in Solid-State Fermentation . . . . . (2)	229
<b>Gwen Falony, Janny Coca Armas, Julio C. Dustet Mendoza and José L. Martínez Hernández</b> Production of Extracellular Lipase from <i>Aspergillus niger</i> by Solid-State Fermentation . . . . . (2)	235
<b>Licia M. Pera, Cintia M. Romero, Mario D. Baigori and Guillermo R. Castro</b> Catalytic Properties of Lipase Extracts from <i>Aspergillus niger</i> . . . . . (2)	247
<b>Vinod Kumar Joshi, Mukesh Parmar and Neerja S. Rana</b> Pectin Esterase Production from Apple Pomace in Solid-State and Submerged Fermentations . . . (2)	253
<b>Sangeeta Negi and Rintu Banerjee</b> Optimization of Amylase and Protease Production from <i>Aspergillus awamori</i> in Single Bioreactor Through EVOP Factorial Design Technique . . . . . (2)	257
<b>Nicemol Jacob and Parukuttyamma Prema</b> Influence of Mode of Fermentation on Production of Polygalacturonase by a Novel Strain of <i>Streptomyces lydicus</i> . . . . . (2)	263
<b>Dhanya Gangadharan, Swetha Sivaramakrishnan, Kesavan Madhavan Nampoothiri and Ashok Pandey</b> Solid Culturing of <i>Bacillus amyloliquefaciens</i> for Alpha Amylase Production . . . . . (2)	269
<b>Dong-Mei Liu, Li Li, Xiao-Quan Yang, Shi-Zhong Liang and Jin-Shui Wang</b> Survivability of <i>Lactobacillus rhamnosus</i> during the Preparation of Soy Cheese. . . . . (3)	417
<b>Lin Li, Jinshui Wang, Mouming Zhao, Chun Cui and Yueming Jiang</b> Artificial Neural Network for Production of Antioxidant Peptides Derived from Bighead Carp Muscles with Alcalase . . . . . (3)	441
<b>Biljana Nikolić, Jasna Stanojević, Branka Vuković-Gačić, Draga Simić and Jelena Knežević-Vukčević</b> The Effects of Vitamin C on Oxidative DNA Damage and Mutagenesis. . . . . (4)	449

<b>Barbara Celuppi Marques, Marcelo Calide Barga, Wellington Balmant, Luiz Fernando de Lima Luz Jr, Nadia Krieger and David Alexander Mitchell</b>		
A Model of the Effect of the Microbial Biomass on the Isotherm of the Fermenting Solids in the Solid-State Fermentation . . . . .	(4)	457
<b>Sumathy Babitha, Carlos R. Soccol and Ashok Pandey</b>		
Jackfruit Seed – A Novel Substrate for the Production of <i>Monascus</i> Pigments through Solid-State Fermentation. . . . .	(4)	465
<b>Yin Li, Jia Lin, Dejing Meng, Jian Lu, Guoxian Gu and Zhonggui Mao</b>		
Effect of pH, Cultivation Time and Substrate Concentration on the Endoxylanase Production by <i>Aspergillus awamori</i> ZH-26 under Submerged Fermentation Using Central Composite Rotary Design . . . . .	(4)	473
<b>Bernardo Onagar Yépez Silva-Santisteban, Attilio Converti and Francisco Maugeri Filho</b>		
Intrinsic Activity of Inulinase from <i>Kluyveromyces marxianus</i> ATCC 16045 and Carbon and Nitrogen Balances . . . . .	(4)	479
<b>Tea Kulišić, Verica Dragović-Uzelac and Mladen Miloš</b>		
Antioxidant Activity of Aqueous Tea Infusions Prepared from Oregano, Thyme and Wild Thyme . . . . .	(4)	485
<b>Marie-Carmen Monje, Monique Berger, Vincent Farines, Karine Reybier, Aude Verger, Jean Daydé, Vassilia Théodorou and Françoise Nepveu</b>		
Antioxidant Capacity of Cotyledons and Germs of Soybean in Relation to Their Isoflavone Content. . . . .	(4)	493
<b>Franjo Ivušić, Marija Soldo Gjeldum, Zvonimir Nemet, Leo Gracin and Vladimir Marić</b>		
Aluminium and Aroma Compound Concentration in Beer During Storage at Different Temperatures. . . . .	(4)	499
<b>María Monagas, Verónica Núñez, Begoña Bartolomé and Carmen Gómez-Cordovés</b>		
Phenolic Content of Blends of Tempranillo with Graciano or Cabernet Sauvignon Wines Produced in Spain. . . . .	(4)	507
<b>Ana Lúcia Barretto Penna, Attilio Converti and Maricé Nogueira de Oliveira</b>		
Simultaneous Effects of Total Solids Content, Milk Base, Heat Treatment Temperature and Sample Temperature on the Rheological Properties of Plain Stirred Yogurt. . . . .	(4)	515

#### PRELIMINARY COMMUNICATIONS

<b>Mukku Shrinivas Rao and Willem F. Stevens</b>		
Fermentation of Shrimp Biowaste under Different Salt Concentrations with Amyolytic and Non-Amyolytic <i>Lactobacillus</i> Strains for Chitin Production. . . . .	(1)	83
<b>Xue-Cai Hao, Xiao-Bin Yu and Zhong-Li Yan</b>		
Optimization of the Medium for the Production of Cellulase by the Mutant <i>Trichoderma reesei</i> WX-112 Using Response Surface Methodology . . . . .	(1)	89
<b>Jesús E. Mejía-Saulés, Krzysztof N. Waliszewski, Miguel A. Garcia and Ramon Cruz-Camarillo</b>		
The Use of Crude Shrimp Shell Powder for Chitinase Production by <i>Serratia marcescens</i> WF . . . . .	(1)	95
<b>Ji-Guo Yang, Yong-Hua Wang, Bo Yang, Geoffrey Mainda and Yong Guo</b>		
Degumming of Vegetable Oil by a New Microbial Lipase . . . . .	(1)	101
<b>Hema Anto, Ujjval Trivedi and Kamlesh Patel</b>		
Alpha Amylase Production by <i>Bacillus cereus</i> MTCC 1305 Using Solid-State Fermentation . . . . .	(2)	241
<b>Subhash U. Nair, Rekha S. Singhal and Madhusudan Y. Kamat</b>		
Enhanced Production of Thermostable Pullulanase Type 1 Using <i>Bacillus cereus</i> FDTA 13 and Its Mutant . . . . .	(2)	275
<b>Syed U. Ahmed, Sudheer K. Singh, Ashok Pandey, Sanjit Kanjilal and Rachapudi B. N. Prasad</b>		
Effects of Various Process Parameters on the Production of $\gamma$ -Linolenic Acid in Submerged Fermentation. . . . .	(2)	283
<b>Young-Jung Wee, Hyang-Ok Kim, Jong-Sun Yun and Hwa-Won Ryu</b>		
Pilot-Scale Lactic Acid Production <i>via</i> Batch Culturing of <i>Lactobacillus</i> sp. RKY2 Using Corn Steep Liquor As a Nitrogen Source . . . . .	(2)	293

<b>Vinod Kumar Joshi, Somesh Sharma and Neerja S. Rana</b> Production, Purification, Stability and Efficacy of Bacteriocin from Isolates of Natural Lactic Acid Fermentation of Vegetables . . . . . (3)	435
<b>Rosa Valéria da Silva Amorim, Rodrigo Pinto Pedrosa, Kazutaka Fukushima, Cosme Rafael Martínez, William MacDonald Ledingham and Galba Maria de Campos-Takaki</b> Alternative Carbon Sources from Sugar Cane Process for Submerged Cultivation of <i>Cunninghamella bertholletiae</i> to Produce Chitosan . . . . . (4)	519
<b>Seda Karasu Yalçın and Zekiye Yesim Özbaş</b> Production of Glycerol by Two Endogenic Wine Yeast Strains at Different Inoculum Size . . . . . (4)	525

#### SCIENTIFIC NOTES

<b>Matija Harcet, Marija Đikić and Vera Gamulin</b> Low Genetic Diversity of the Turopolje Pig Breed . . . . . (1)	105
<b>Ming-Jin Zhang, Yue-Ming Jiang, Wei-Bo Jiang and Xue-Jun Liu</b> Regulation of Ethylene Synthesis of Harvested Banana Fruit by 1-Methylcyclopropene . . . . . (1)	111
<b>Ismail Sait Dogan</b> Effect of Oven Types on the Characteristics of Biscuits Made from Refrigerated and Frozen Doughs . . . . . (1)	117
<b>Sarvamangala R. Patil and Agasar Dayanand</b> Exploration of Regional Agrowastes for the Production of Pectinase by <i>Aspergillus niger</i> . . . . . (2)	289
<b>Zi-Tao Jiang, Qing-Feng Zhang, Hui-Lin Tian and Rong Li</b> The Reaction of Allyl Isothiocyanate with Hydroxyl/Water and $\beta$ -Cyclodextrin Using Ultraviolet Spectrometry . . . . . (3)	423
<b>Qiang-Zhong Zhao, Jin-Shui Wang, Mou-Ming Zhao, Yue-Ming Jiang and Cui Chun</b> Effect of Casein Hydrolysates on Yogurt Fermentation and Texture Properties during Storage . . . (3)	429
<b>Hai Liu, Yueming Jiang, Yunbo Luo and Weibo Jiang</b> A Simple and Rapid Determination of ATP, ADP and AMP Concentrations in Pericarp Tissue of Litchi Fruit by High Performance Liquid Chromatography . . . . . (4)	531
<b>Zhong Qiuping, Xia Wenshui and Yueming Jiang</b> Effects of 1-Methylcyclopropene Treatments on Ripening and Quality of Harvested Sapodilla Fruit . . . . . (4)	535
<b>Mario Cruz-Hernández, Christopher Augur, Raúl Rodríguez, Juan Carlos Contreras-Esquivel and Cristóbal Noé Aguilar</b> Evaluation of Culture Conditions for Tannase Production by <i>Aspergillus niger</i> GH1 . . . . . (4)	541
<b>José A. Ramírez, Rocio C. Gómez-Ayala, Cuauhtémoc Jacques-Hernández and Manuel Vázquez</b> Evaluation of Treatments to Reduce Hardness of <i>Agave americana</i> Core . . . . . (4)	545

#### REVIEWS

<b>Meritxell Nus, Francisco J. Sánchez-Muniz and José M. Sánchez-Montero</b> Methodological Aspects and Relevance of the Study of Vegetable Oil, Fat and Lipoprotein Oxidation Using Pancreatic Lipase and Arylesterase . . . . . (1)	1
<b>Ralf Greiner and Ursula Konietzny</b> Phytase for Food Application . . . . . (2)	125
<b>Carlos R. Soccol, Luciana P. S. Vandenberghe, Cristine Rodrigues and Ashok Pandey</b> New Perspectives for Citric Acid Production and Application . . . . . (2)	141
<b>Prabhjeet Singh and Prabhjot Kaur Gill</b> Production of Inulinases: Recent Advances . . . . . (2)	151
<b>Young-Jung Wee, Jin-Nam Kim and Hwa-Won Ryu</b> Biotechnological Production of Lactic Acid and Its Recent Applications . . . . . (2)	163
<b>Swetha Sivaramakrishnan, Dhanya Gangadharan, Kesavan Madhavan Nampoothiri, Carlos Ricardo Soccol and Ashok Pandey</b> $\alpha$ -Amylases from Microbial Sources – An Overview on Recent Developments . . . . . (2)	173

<b>Sumitra Ramachandran, Pierre Fontanille, Ashok Pandey and Christian Larroche</b>		
Gluconic Acid: Properties, Applications and Microbial Production . . . . .	(2)	185
<b>Armin Spök</b>		
Safety Regulation of Food Enzymes. . . . .	(2)	197
<b>Alagarsamy Sumantha, Christian Larroche and Ashok Pandey</b>		
Microbiology and Industrial Biotechnology of Food-Grade Proteases: A Perspective . . . . .	(2)	211
<b>Ernesto Favela-Torres, Tania Volke-Sepúlveda and Gustavo Viniegra-González</b>		
Production of Hydrolytic Depolymerising Pectinases . . . . .	(2)	221
<b>Leifa Fan, Huijuan Pan, Andrea Thomaz Soccol, Ashok Pandey and Carlos Ricardo Soccol</b>		
Advances in Mushroom Research in the Last Decade . . . . .	(3)	303
<b>Laurent Dufossé</b>		
Microbial Production of Food Grade Pigments . . . . .	(3)	313
<b>Hélène Barreteau, Cédric Delattre and Philippe Michaud</b>		
Production of Oligosaccharides as Promising New Food Additive Generation . . . . .	(3)	323
<b>María Asunción Longo and María Angeles Sanromán</b>		
Production of Food Aroma Compounds: Microbial and Enzymatic Methodologies . . . . .	(3)	335
<b>Jerome Warrand</b>		
Healthy Polysaccharides – The Next Chapter in Food Products . . . . .	(3)	355
<b>Bussarin Kosin and Sudip Kumar Rakshit</b>		
Microbial and Processing Criteria for Production of Probiotics: A Review . . . . .	(3)	371
<b>Shrikant A. Survase, Ishwar B. Bajaj and Rekha S. Singhal</b>		
Biotechnological Production of Vitamins. . . . .	(3)	381
<b>Gustavo Viniegra-González and Ernesto Favela-Torres</b>		
Why Solid-State Fermentation Seems to be Resistant to Catabolite Repression?. . . . .	(3)	397
<b>Argyro Bekatorou, Costas Psarianos and Athanasios A. Koutinas</b>		
Production of Food Grade Yeasts . . . . .	(3)	407

## APPENDIX

<b>Ashok Pandey, Christian Larroche and Carlos R. Soccol</b>		
Preface. . . . .	(2)	123
<b>Kata Galić</b>		
Book Review . . . . .	(2)	300
<b>Ashok Pandey, Christian Larroche and Carlos R. Soccol</b>		
Preface. . . . .	(3)	301

## AUTHOR INDEX

- Aguilar, Cristóbal Noé . . . . . (2, 4) 229, 541  
 Ahmed, Syed U. . . . . (2) 283  
 Amorim, Rosa Valéria da Silva . . . . . (4) 519  
 Anto, Hema . . . . . (2) 241  
 Aranda, Cuitlahuac . . . . . (2) 229  
 Augur, Christopher . . . . . (4) 541
- Babitha, Sumathy . . . . . (4) 465  
 Baigori, Mario D. . . . . (2) 247  
 Bajaj, Ishwar B. . . . . (3) 381  
 Balmant, Wellington . . . . . (4) 457  
 Banerjee, Rintu . . . . . (2) 257  
 Barreteau, Hélène . . . . . (3) 323  
 Barretto Penna, Ana Lúcia . . . . . (4) 515  
 Bartolomé, Begoña . . . . . (4) 507  
 Bekatorou, Argyro. . . . . (3) 407  
 Berger, Monique . . . . . (4) 493

## SUBJECT INDEX

## A

- $\alpha$ -1,4-O-glycosidic bonds  
of polysaccharides, hydrolysed by  $\alpha$ -amylase, 173
- acidic protease  
application of, 211  
methods of production and improvement of, 211
- acidification  
of yogurt by probiotic bacteria in the presence of casein hydrolysates, 429
- activated carbon  
adsorption of aroma compounds produced by solid-state fermentation, 47  
packed in glass adsorbent columns, 47
- adsorption  
of aroma compounds in adsorbent columns produced by solid-state fermentation, 47
- Agave americana*  
evaluation of treatments to reduce hardness of, 545
- agroresidues  
utilization in alpha amylase production by solid-state fermentation, 269
- agro-industrial residues  
utilization in citric acid production by solid-state fermentation, 141
- agrowastes  
as substrates for pectinase production by *Aspergillus niger*, 289
- alkaline pectinases  
produced by bacteria, 221
- allyl isothiocyanate  
the reaction with hydroxyl/water and  $\beta$ -cyclodextrin, 423
- aluminium  
in beer during storage at different temperatures, 499
- amylase  
optimization of production in single bioreactor through evolutionary operation (EVOP), 257
- $\alpha$ -amylase  
downstream processing, biochemical properties, applications, 173  
from microbial sources, characteristics and production of, 173  
production by solid-state fermentation, 241  
production on wheat bran and rice flakes, 241  
production by culturing of *Bacillus amyloliquefaciens*, 269  
production on different agroresidues, 269
- 1-aminocyclopropane-1-carboxylic acid  
delayed increase of concentration in bananas, 111
- antigenotoxic potential  
of vitamin C, 449
- antimicrobial activity  
of compounds found in the mushrooms, 303  
of bacteriocin produced during lactic acid fermentation of vegetables, 435
- antioxidant activity  
of aqueous tea infusions from oregano, thyme and wild thyme, 485
- antioxidant capacity  
of soybeans, 493
- antioxidant peptides  
production from bighead carp muscles with alcalase, 441
- antitumor activity  
of compounds found in the mushrooms, 303
- aqueous tea infusion  
of oregano, thyme and wild thyme, 485
- apparent viscosity  
of yogurt, determined by response surface methodology, 515
- Armoracia rusticana*  
conditions of enzymatic hydrolysis of thioglucosides from, 41
- artificial neural network  
for production of antioxidant peptides, 441
- arylesterase  
inhibition of LDL oxidation in metabolism of fat, 1  
intrinsic and extrinsic factors that influence its activity, 1
- aroma compounds  
production from agro-industrial residues by solid-state fermentation, 47  
production using plant cells, microorganisms and enzyme technology, 335  
during storage of beer at different temperatures, 499
- Aspergillus awamori*  
strain MTCC 6652, for optimization of amylase and protease production, 257  
strain ZH-26, for endoxylanase production, 473
- Aspergillus niger*  
extracellular endoinulase production by, 53  
strain 20 OSM, 53  
improvement of fructanohydrolase production by sucrose ester, 59  
in gluconic acid production, 185  
invertase activity expression in strain Aa-20, 229  
production of extracellular lipase from strain J-1 by solid-state fermentation, 235  
screening of lipolytic extracts from strain MYA 135, 247  
pectin methylesterase production by, in solid-state and submerged fermentation, 253  
pectinase production by strains DMF 27 and DMF 45 on agrowaste as a substrate, 289  
strain GH1, for tannase production, 541
- ATP, ADP and AMP concentrations  
in pericarp tissue of litchi fruit, 531
- autochthonous pig  
of the Turopolje breed, 105

**B**

- $\beta$ -cyclodextrin
  - reaction with allyl isothiocyanate, 423
- Bacillus amyloliquefaciens*
  - for alpha amylase production on agroresidues using strain ATCC 23842, 269
- Bacillus cereus*
  - production of  $\alpha$ -amylase under solid-state fermentation by strain MTCC 1305, 241
  - production of thermostable pullulanase using strain FDTA 13 from tapioca soil, 275
  - antimicrobial activity of bacteriocin on, 435
- Bacillus megaterium*
  - spore germination, 17
- bacteriocin
  - production, purification, stability and efficacy of, 435
- banana
  - regulation of ethylene synthesis in, 111
- beer
  - aluminium and aroma compound concentration in, 499
- beneficial polysaccharides
  - as fat replacers, 355
- biodegradable polymers
  - as cheap raw materials for lactic acid production by microorganisms, 163
- bighead carp
  - for production of antioxidant peptides from, 441
- biopolymers
  - for chitin production from shrimp biowaste, 83
- biopreservative
  - effect of bacteriocin, in fruit products, 435
- biotransformation
  - for production of food aroma compounds, 335
- biotechnological production
  - comparison of chemical production of vitamins with, 381
  - of vitamins, 381
- biscuits
  - characteristics of, after refrigeration and freezing, 117
- bottle ageing
  - influence on phenolic content of wines, 507
- Brevibacterium* sp.
  - synthesis of aryl carotenoids using, 313
- brewer's yeast
  - as nutrient, 407

**C**

- Cabernet Sauvignon
  - phenolic content of blends of, 507
- carbon source
  - for inulinase production, 479
- carotenoids
  - as food grade pigments, 313
  - microbial production of, 313
- casein hydrolysates
  - effects on yogurt fermentation and texture properties during storage, 429

- cellulase
  - high activity in mutant strain *Trichoderma reesei* WX-112, 89
  - used for cellulose hydrolysis, 89
- central composition design (CCD)
  - estimation of quadratic response domain for cellulase production by *Trichoderma reesei*, 89
- Ceratocystis fimbriata*
  - production of aroma compounds by solid-state fermentation, 47
- cereals
  - enhancement with  $\gamma$ -linolenic acid by fungal solid-state fermentation, 75
- chemical composition
  - of lean rabbit meat, 65
- chitin
  - production by fermentation of shrimp waste with *Lactobacillus plantarum* strains, 83
- chitinase
  - hydrolysis of chitin by, 95
- chitosan
  - production on alternative carbon sources, 519
- cholesterol
  - content in lean rabbit meat, 65
- citric acid
  - improvement of citric acid producing strains, 141
  - solid-state fermentation for production of, 141
- coffee husk
  - substrate for aroma compounds production by solid-state fermentation, 47
- colour
  - of the core of *Agave americana* after different treatments, 545
- combined processes
  - addition of different antimicrobials in food to prevent food spoilage, 17
  - of thermal treatment of food and natural antimicrobials to prevent food spoilage, 17
- complexation
  - of allyl isothiocyanate and  $\beta$ -cyclodextrin, 423
- corn
  - as a substrate in modelling of solid-state fermentation, 457
- corn steep liquor
  - as a nitrogen source for lactic acid production, 293
- cultivar
  - antioxidant activity of soybean, depending on, 493
- culture conditions
  - during tannase production by *Aspergillus niger*, 541
- Cunninghamella bertholletiae*
  - for chitosan production, 519
- cytogenetics
  - of mushrooms, 303

**D**

- degumming
  - of edible oil with a new microbial lipase, 101
  - of oil in physical refining of edible oil, 101

determination  
 of ATP, ADP and AMP concentration in litchi fruit pericarp tissue, 531

dietary fibre  
 as a functional food product, 355

dietary supplement  
 pharmaceutically active mushroom compounds used as, 303

digestion  
 phytate degradation during, 125

distiller's yeast  
 for production of alcoholic beverages, 407

DNA  
 oxidative damage, 449

## E

emulsifying properties  
 of gluten hydrolysate/ $\lambda$ -carrageenan, 25  
 of  $\lambda$ -carrageenan, 25

endoinulinase  
 extracellular, produced by *Aspergillus niger* 20 OSM, 53  
 production from different microbes, 151

endoxylanase  
 optimization of production of, 473

enzymatic hydrolysis  
 of thioglucosides in *Armoracia rusticana*, 41  
 of proteins in bighead carp muscles with alcalase, 441

enzymatic phytate dephosphorylation  
 by phytases, identified in plants, microorganisms and animal tissues, 125

enzyme assay  
 substrates for determination of neutral and acidic protease kinetics, 211

enzyme engineering  
 in  $\alpha$ -amylase production, 173

enzyme legislation  
 for food enzymes, regarding their potential toxic and allergenic effects, 197

enzyme purification  
 by ion exchange chromatography on DEAE Sepharose, 53  
 of extracellular endoinulinase, 53  
 of endoinulinases and exoinulinases produced from different microbes, 151

enzyme stability  
 of lipases regarding temperature, solvents and substrates, 247

enzyme synthesis  
 in microbial cells grown on the solid surface during solid-state fermentation, 397

*Escherichia coli*  
 inhibition of growth in milk after thermal and pressure processing, 33  
 strains O157:H7 (94 and 402) and saprophytic strain 1, 33  
 antimicrobial activity of bacteriocin against, 435  
 strains K12 and WP2 used for mutagenicity testing of vitamin C, 449

ethylene  
 inhibition by 1-methylcyclopropene, 111

EVOP (evolutionary operation)  
 factorial design technique for optimization of amylase and protease production, 257

exoinulinase  
 possible application, 151  
 production from different microbes, 151

expression  
 of ACC synthetase and ACO genes in banana after treatment with 1-MCP, 111

expression kinetics  
 of invertase produced by *Aspergillus niger* Aa-20, 229

extracellular enzyme  
 endoinulinase, produced by *Aspergillus niger* 20 OSM, 53

## F

fat  
 pancreatic lipase and arylesterase in metabolism of, 1

fat replacers  
 healthy polysaccharides as, 355

fatty acid composition  
 of lean rabbit meat, 65

fermentation  
 lactic acid production in, 163  
 $\alpha$ -amylase production in submerged and solid-state fermentation, 173  
 neutral and acidic protease production in, 211  
 lactic acid production in pilot-scale, 293  
 vitamin production in, 381  
 of soymilk by *Lactobacillus casei* ssp. *rhamnosus* 6013, 417

flow behaviour  
 of yogurt depending on content of solids and heat temperature, 515

food enzymes  
 allergenic and toxic properties, 197  
 food safety regulations and legislation of, 197

food grade pigments  
 produced by microorganisms, 313

food grade proteases  
 microbiology and biotechnology of, 211

food grade yeasts  
 as alternative sources of proteins, enzymes and vitamins, 407

food industry  
 production of food ingredients with health promoting activities, 355

food mimetics  
 polysaccharides and dietary fibres used as, 355

food preservative  
 oligosaccharides as, 323

food processing  
 optimization of phytate degradation during, 125

food safety  
 regarding food enzymes, 197

fractional factorial design (FFD)  
 for elucidation of medium components for cellulase production by *Trichoderma reesei*, 89

frozen dough  
 characteristics of biscuits made from, 117

fructanohydrolase  
 production by *Aspergillus niger* SL-09 in presence of sucrose ester, 59

functional food  
 phytase application in the production of, 125

fungi  
 capability for enrichment of cereals with  $\gamma$ -linolenic acid by solid-state fermentation, 75

## G

$\gamma$ -linolenic acid  
 deficiency in cereal-based diet, 75  
 enrichment of cereals with, by solid-state fermentation, 75  
 effects of various process parameters on the production of, 283

genetic breeding  
 for determination of genes that encode different species of mushrooms, 303

genetic diversity  
 of the Turopolje pig breed, 105

genetic engineering  
 for improvement of protease production, 211

gluconic acid  
 production, properties and application of, 185

glucose oxidase  
 facilitation of gluconic acid production with, 185

glycerol  
 production by endogenic wine yeast strains, 525

Graciano wine  
 phenolic content of blends of Tempranillo with, 507

grape  
 phenolic content of seeds and skins, 507

## H

hardness  
 of *Agave americana* core, 545

health  
 influence of eating habits on, 355  
 functional foods with positive effects on, 355

high temperature  
 effect on *E. coli* survival in milk, 33

high pressure  
 effect on *E. coli* survival in milk, 33

HPLC  
 used for sugar determination in soy cheese, 417  
 determination of ATP, ADP and AMP in pericarp tissue of litchi fruit by, 531

hydroxyl  
 reaction of allyl isothiocyanate with, 423

## I

inulin  
 from *Agave americana* as a valuable source of, 545

inulinase

endo- and exoinulinase, 151  
 production of, 151  
 production by *Kluyveromyces marxianus* ATCC 16045, 479

invertase  
 evaluation of activity expression of, 229

isoflavones  
 antioxidant capacity of soybean depending on content of, 493

isotherms  
 affected by the biomass in solid-state fermentation, 457

isothiocyanates  
 as products of myrosinase activity in *Armoracia rusticana*, 41

## J

jackfruit seed powder  
 as a substrate for production of pigments, 465

## K

kefir  
 lactose-fermenting yeasts in, 407  
*Kluyveromyces marxianus*  
 strain ATCC 16045 used for inulinase production, 479

## L

$\lambda$ -carrageenan  
 effect of reaction time on emulsifying properties of the conjugate of gluten hydrolisate with, 25  
 the regression model for emulsion activity index of conjugate of, 25

lactic acid  
 application of, 163  
 production by microorganisms, 163  
 raw material for production of, 163  
 production on corn steep liquor as a nitrogen source via batch culturing of *Lactobacillus* sp., 293

lactic acid bacteria  
 homofermentative and heterofermentative, 163  
 strains for lactic acid production, 163

lactic acid fermentation  
 production of bacteriocin during, 435

*Lactobacillus* sp.  
 strain RKY2 for lactic acid production, 293  
 bacteriocin production during lactic acid fermentation of vegetables by, 435

*Lactobacillus casei* ssp. *rhamnosus* 6013  
 survivability during the preparation of soy cheese, 417

*Lactobacillus plantarum* strains  
 for chitin production, 83

*Lamiaceae*  
 family, antioxidant activity of, 485

limited enzymatic hydrolysis  
 by proteases for improvement of solubility and properties of emulsion and foam of wheat gluten, 25

lipase  
 for degumming of vegetable oil, 101  
 production by submerged and solid-state fermentation, 235  
 screening of lipolytic activity of, produced by *Aspergillus niger*, 247

litchi fruit  
 ATP, ADP and AMP concentrations in, 531

lipoproteins  
 as a cardiovascular disease risk, 1  
 HDL and LDL metabolism, 1  
 inhibition of oxidation of LDL by arylesterase, 1

low fat/calorie products  
 polysaccharides as fat replacers in, 355

**M**

mathematical models  
 for solid-state and submerged fermentation in relation to catabolite repression resistance, 397  
 of the effect of the microbial biomass on the isotherm of the fermenting solids, 457

1-methylcyclopropene  
 as an inhibitor of ethylene action, 111  
 used for banana treatment, 111  
 effect on sapodilla fruit ripening, 535

microbial pigment  
 production as a natural colouring alternative used in food, 313

microbial production  
 of gluconic acid by *Aspergillus niger* and *Gluconobacter*, 185

microorganisms  
 reduction of growth in food by natural antimicrobials, 17  
 used for food aroma compounds production, 335

microsatellites  
 determination for genetic diversity study of the Turopolje pig breed, 105

mitochondrial D-loop  
 sequencing for determination of genetic diversity of the Turopolje pig breed, 105

modeling  
 of chitinase production by *Serratia marcescens* WF, 95

molasses  
 as a carbon source for chitosan production, 519

*Monascus* sp.  
 production of red food grade pigment by, 313  
 production of pigment on jackfruit seed powder as a substrate using, 465

*Mucor* sp.  
 production of  $\gamma$ -linolenic acid in submerged fermentation by, 283

multistrain  
 cultures of probiotics, 371

mushrooms  
 as a source of pharmaceutically active compounds, 303

mutation  
 of parent strain *Bacillus cereus* FDTA 13 to increase pullulanase production, 275

isolation of *Bacillus cereus* FDTA 13/NTG04-B4 mutant strain, 275

*myo*-inositol phosphates  
 substrates for phytase enzymatic activity, 125

**N**

natural antimicrobials  
 influence of nisin, carvacrol and thymol on inactivation and growth of *Bacillus megaterium*, 17

neutral protease  
 application of, 211  
 methods of production and improvement of, 211

nitrogen source  
 for inulinase production, 479

nutraceuticals  
 physiological and health benefits of, 355

nutrition  
 impact on health, 355

**O**

oils  
 structural changes due to hydrolysis and autooxidation, 1

oligosaccharides  
 as a new generation of food additives, 323  
 as prebiotics or biopreservatives, 323

optimization  
 of fructanohydrolase production using response surface methodology, 59  
 of cellulase production, 89  
 of  $\alpha$ -amylase production under solid-state fermentation, 241  
 of fermentation conditions for thermostable pullulanase, 275  
 of endoxylanase production, 473

oregano  
 antioxidant activity of, 485

orthogonal array  
 for optimization of maximal pullulanase production, 275

oven type  
 effects of, on the characteristics of biscuits, 117

**P**

pancreatic lipase  
 influence of intrinsic and extrinsic factors on, 1  
 study of *in vitro* digestion of oils and fats using, 1  
 study of the triacylglycerol fatty acid composition using, 1

pathogenic microorganisms  
 antimicrobial activity of bacteriocin on, 435

pectin  
 rich agrowastes used for pectinase production, 289

pectinase  
 methods and microorganisms used for production of, 221  
 strategies used to obtain higher activity of, 221

- production on pectin rich agrowastes, 289
- pectin lyase  
production by novel strain of *Streptomyces lydicus*, 263
- pectin methylesterase  
production in solid-state and submerged fermentation on pomace, 253
- pericarp tissue  
ATP, ADP and AMP concentrations in, 531
- phenolic compounds  
in Tempranillo, Graciano and Cabernet Sauvignon wines produced in Spain, 507
- phytase  
initiation of dephosphorylation of phytate, 125  
supplement in diet of monogastric animals, 125
- phytate  
substrates for enzymatic activity of phytase, 125
- pigment  
production on jackfruit seed powder as a substrate, 465
- pilot-scale  
bioreactor scheme used for lactic acid production via batch culturing of *Lactobacillus* sp., 293
- plant cell culture  
used for food aroma compounds production, 335
- polygalacturonases  
methods and microorganisms used for production of, 221  
strategies used to obtain higher activity of, 221  
production by novel strain of *Streptomyces lydicus*, 263
- poly(lactic acid)  
polymerization of L(+)- or D(-)-lactic acid, 163
- polysaccharides  
as fat replacers, 355
- pomace  
production of pectin esterase by *Aspergillus niger* from, 253
- postharvest  
ripening of sapodilla fruit after treatment with 1-methylcyclopropene, 535
- prebiotics  
oligosaccharides as, 323  
polysaccharides as, 355
- probiotics  
adhesion and immune response of, 371  
isolation, identification, production and storage of, 371  
thermophilic and thermotolerant, 371  
yeasts used as, 407
- probiotic count  
during fermentation and storage of yogurt, 429
- probiotic soy cheese  
produced by fermentation of soymilk with *Lactobacillus casei* ssp. *rhamnosus* 6013, 417
- process optimization  
of  $\alpha$ -amylase production, 173
- process parameters  
for  $\gamma$ -linolenic acid production with different *Mucor* sp. strains, 283
- production kinetics  
of glycerol, 525
- propagation  
of food grade yeasts, 407
- protease  
optimization of production in single bioreactor through EVOP (evolutionary operation), 257
- protein-polysaccharide  
interaction with gluten, 25  
improvement of dough stability, bread performance and bread shelf life with, 25
- pullulanase type 1  
production of, 275
- purification  
of neutral and acidic proteases after fermentation production, 211
- ## Q
- quality  
of sapodilla fruit after harvesting, 535
- ## R
- rabbit meat  
influence of genotype lines, age and sexes on the composition of, 65
- raw materials  
used as substrates for production of food grade yeasts, 407
- recovery  
of volatile aroma compounds in solid-state fermentation, 47
- refrigerated dough  
characteristics of biscuits made from, 117
- resistance to catabolite repression  
in solid-state fermentation, 397
- respiration  
delayed after banana treatment with 1-methylcyclopropene, 111
- response surface methodology  
for determination of gluten hydrolysate/ $\lambda$ -carrageenan ratio and emulsifying properties, 25  
optimization of fermentation medium for cellulase production using, 89  
optimization of endoxylanase production by central rotary design, 473
- rheology  
of yogurt, 515
- Rhizopus oryzae*  
soybeans fermented with, 457
- ripening  
of sapodilla fruit, 535
- risk assessment  
of food enzymes in EU, 197
- ## S
- Saccharomyces cerevisiae*  
antigenotoxic/genotoxic effect of vitamin C in yeast comet assay, 449  
strain D7 reversion assay, 449  
strains Kalecik 1 and Narince 3, used for glycerol production, 525

- safety evaluation  
of food enzymes, 197
- sapodilla fruit  
effects of 1-methylcyclopropene on ripening of, 535
- sensory properties  
of lean rabbit meat, 65  
of yogurt in presence of casein hydrolysates, 429
- Serratia marcescens*  
chitinase production by strain WF, 95
- shrimp waste  
for chitinase production by *Serratia marcescens*, 95
- single cell protein  
production by food grade yeasts, 407
- slurry-state fermentation  
used for polygalacturonase production by *Streptomyces lydicus*, 263
- solid-state fermentation  
production of aroma compounds, 47  
to enrich cereals with  $\gamma$ -linolenic acid using *Thamnidium elegans*, 75  
new possibility for citric acid production in, 141  
evaluation of invertase activity expression on two substrates in, 229  
for production of extracellular lipase from *Aspergillus niger*, 235  
for production of  $\alpha$ -amylase by *Bacillus cereus*, 241  
for production of pectin methylesterase by *Aspergillus niger*, 253  
for optimization of production of amylase and protease by *Aspergillus awamori*, 257  
for polygalacturonase production by *Streptomyces lydicus*, 263  
for alpha amylase production on agroresidues by *Bacillus amyloliquefaciens*, 269  
for production of pectinase on pectin rich agrowastes by *Aspergillus niger*, 289  
resistance to catabolite repression of enzyme synthesis in, 397  
of soybean by *Rhizopus oryzae*, 457  
for pigment production on jackfruit seed powder by *Monascus purpureus*, 465  
for tannase production by *Aspergillus niger* GH1, 541
- solvent tolerance  
of lipases to the presence of organic solvents and water, 247
- soybeans  
isotherms of, 457  
antioxidant capacity of, in relation to their isoflavone content, 493
- soy cheese  
preparation of, 417
- stability  
of bacteriocin, 435
- Staphylococcus*  
antimicrobial activity of bacteriocin, 435
- storage  
aluminium and aroma compound concentration depending on, 499  
of beer at different temperatures, 499
- Streptomyces lydicus*  
production of polygalacturonase by, 263
- submerged fermentation  
for citric acid production, 141  
for production of pectin methylesterase by *Aspergillus niger*, 253  
for production of polygalacturonase by *Streptomyces lydicus*, 263  
for production of  $\gamma$ -linolenic acid by *Mucor* sp., 283  
for production of pectinase on pectin rich agrowastes by *Aspergillus niger*, 289
- substrate specificity  
for lipase activity, 247
- submerged culture  
for chitosan production on alternative carbon source, 519
- sucrose ester  
in fructanohydrolase production by *Aspergillus niger* SL-09, 59
- sugar cane juice  
used as a substrate for chitosan production, 519
- survival  
of *E. coli* strains in milk after exposure to high pressure and temperature, 33
- survivability  
of *Lactobacillus casei* ssp. *rhamnosus* 6013 during soymilk fermentation, 417
- synthesis  
of ethylene, 111
- ## T
- tannase  
evaluation of culture conditions during production of, 541  
production by *Aspergillus niger* in solid-state fermentation, 541
- Tempranillo wine  
phenolic content of blends of, 507
- texture properties  
of yogurt during storage, 429
- Thamnidium elegans*  
production of  $\gamma$ -linolenic acid on cereals by, 75
- thermal oxidized fats  
*in vitro* and *in vivo* metabolism of, 1  
structural changes during repeated frying, 1
- thermal treatment  
effect on *Bacillus megaterium* spore germination and growth inhibition, 17
- thermophilic  
probiotics, 371
- thermoresistance  
of lipases from *Aspergillus niger*, 247
- thermostability  
of inulinases produced from different microbes, 151
- thermostable pectinases  
optimal temperature for the production of, 221  
production by yeasts and bacteria, 221
- thermostable pullulanase  
optimization of fermentation conditions for the production of, 275

thermotolerant  
  probiotics, 371  
thioglucosides  
  from *Armoracia rusticana*, 41  
  hydrolysis by myrosinase, 41  
thyme  
  antioxidant activity of, 485  
*Torula* sp.  
  as a nutritional supplement in animal feed, 407  
*Trichoderma reesei*  
  high cellulase activity of strain WX-112, 89

## V

vegetable oil  
  physical refining of, 101  
viability  
  of probiotic bacteria in yogurt during storage, 429  
vitamin C  
  effects on oxidative DNA damage and mutagenesis,  
  449  
vitamins  
  production by biotechnological processes, 381

## W

wheat bran  
  as a substrate for  $\alpha$ -amylase production, 241

wheat gluten  
  as a substrate for limited enzymatic hydrolysis  
  with Protamex enzyme, 25  
whey  
  lactose fermenting yeasts produced from, 407  
wild thyme  
  antioxidant activity of, 485  
wine blends  
  of Tempranillo with Graciano or Cabernet Sauvignon,  
  507  
wine yeasts  
  used for glycerol production, 525  
wood hydrolyzate  
  cell growth and lactic acid production affected by  
  toxic chemicals from, 293  
  used in pilot-scale lactic acid production, 293

## Y

yeast comet assay  
  antigenotoxic/genotoxic effects of vitamin C in,  
  449  
yogurt  
  effects of casein hydrolysates during fermentation  
  of, 429  
  consistency of, 515  
  rheological properties of, 515
