

CROATICA CHEMICA ACTA

Croat. Chem. Acta Vol. **75** No. 2

III–IV, 319–661, A31–A40, C5–C10 (2002)

Zagreb, June, 2002

CONTENTS

Editorial		III–IV
Milan Randić – Life and Work	. . . Sonja Nikolić and Nenad Trinajstić	319–327
Mathematical Chemistry	. . . Nenad Trinajstić and Ivan Gutman	329–356
Molecular Graphs with Minimal and Maximal Randić Indices	. . . Ivan Gutman	357–369
The Meaning of Molecular Connectivity: A Bimolecular Accessibility Model	. . . Lemont B. Kier and Lowell H. Hall	371–382
Global Molecular Identification from Graphs. Main-group Triatomic Molecules	. . . Jonathan Geach, Chris J. Walters, Bryan James, Ken E. Caviness, and Ray A. Hefferlin	383–400
Resistance Distances in Fullerene Graphs	. . . Patrick W. Fowler	401–408
Higher-level Descriptors in Molecular Connectivity	. . . Lionello Pogliani	409–432
Chemical Meaning of Octane Number Analyzed by Topological Indices	. . . Haruo Hosoya	433–445
Riemann Surfaces as Descriptors for Symmetrical Negative Curvature Carbon and Boron Nitride Structures	. . . R. Bruce King	447–473
A QSPR Study of Sweetness Potency Using the CODESSA Program	. . . Alan R. Katritzky, Ruslan Petrukhin, Subbu Perumal, Mati Karelson, Indra Prakash, and Nitin Desai	475–502
2D Mapping of Large Quantities of Multi-variate Data	. . . Jure Zupan	503–515
QSAR of Flavonoids: 4. Differential Inhibition of Aldose Reductase and p56 ^{lck} Protein Tyrosine Kinase	. . . Alenka Štefanič-Petek, Aleš Krbavčič, and Tom Šolmajer	517–529

(Continued on inside back cover)

(Continued from outside back cover)

Determination of Optimal Conditions to Achieve Maximal Response at Maximal Repeatability in FIA-AMZ Experiment through a Mathematical Modelling Approach . . . Milko Novič and Marjana Novič	531–543
Quantitative Structure-Activity Relationship of Tricyclic Carbapenems: Application of Artificial Intelligence Methods for Bioactivity Prediction . . . Mira Lebez, Tom Šolmajer, and Jure Zupan	545–562
On Morgan-trees . . . István Lukovits and Ivan Gutman	563–576
Building-block Computation of Wiener-type Indices for the Virtual Screening of Combinatorial Libraries . . . Ovidiu Ivanciuc and Douglas J. Klein	577–601
Corroborating a Modification of the Wiener Index . . . Ivan Gutman and Janez Žerovnik	603–612
On the Wiener Number of Thorn Trees, Stars, Rings, and Rods . . . Danail Bonchev and Douglas J. Klein	613–620
π -Molecular Orbitals of Conjugated Linear Polyene Molecules as Molecular Orbital Functional Groups in the Design of Near-infrared Dyes . . . Jerry Ray Dias and Gamil A. Guirgis	621–632
Resistance-Distance Sum Rules . . . Douglas J. Klein	633–649
Computing the Variable Vertex-connectivity Index . . . Nenad Kezele, Leo Klasinc, Jan von Knop, Sanja Ivaniš, and Sonja Nikolić	651–661
Erratum	A31–A32
Book reviews	A33–A40
Announcements and Advertisements	C5–C10
