

Erratum

In *Croat. Chem. Acta* **74** (2001) A1–A5, Obituary: RATIVOJ SEIWERTH (1916–2000), complete information relating to the publication of the first synthesis of adamantane should read: V. Prelog and R. Seiwerth, *Chem. Ber. Deutsch. Chem. Ges.* **74B** (1941) 1644-1648, (referred in CA **36** (1942) 7019²).

This reference should replace the data given on page A2, line 5 from the bottom.

IUPAC

Osnovno stereokemijsko nazivlje
*[Basic Terminology of Stereochemistry]*HDKI – Kemija u industriji, Zagreb, 2001, 64 pp.
ISBN 953-6894-01-7

»Osnovno stereokemijsko nazivlje« is the stereochemistry reference book translated into the Croatian language by M. Žinić from the original »BASIC TERMINOLOGY OF STEREOCHEMISTRY«, IUPAC Recommendations 1996, *Pure & Appl. Chem.* **68** (1996) 2193-2222, prepared by G. P. Moss.

The translated reference book is a Glossary of very important and the most widely used stereochemical terms. It extends the list of terms defined in the IUPAC Nomenclature of Organic Chemistry, Section E: Stereochemistry, and includes some terms from the Glossary of Terms used in Physical Organic Chemistry. Additional terms have been added from inorganic and macromolecular chemistry. Some misleading terms are included together with guidance on their correct usage or acceptable alternatives.

»Osnovno stereokemijsko nazivlje« is a valuable book of reference, which can be used both as a glossary for the graduate and undergraduate students of chemistry, chemical engineering, biotechnology, pharmacy, and medicine as well as a reference book for the professionals working in academic institutions or in industry.
