

Cijenjeni čitatelji!

U ovom broju našeg časopisa možete u pet znanstvenih radova naći zanimljive podatke o našoj entomofauni: Mantodea, Coleoptera (Buprestidae Coccinellidae i Scarabaeidae) i Lepidoptera. Pisali su ih naši, slovenski i poljski autori. Uvrstili smo i radove o paucima skakačima u kojima je na zanimljiv način opisana pojava njihova okupljanja.

Vrijedan je i pregledan znanstveni rad u kojem je dat popis Orthoptera iz zbirke Zoologijskog zavoda PMF-a u Zagrebu. Pročitajte i naše zanimljive ali i značajne vijesti.

Za ovaj broj utrošili smo puno energije ali i dobre volje. Na putu smo ON LINE izlaženja časopisa. Bio bi to veliki korak za naš časopis, ali moramo pronaći veća financijska sredstva. Teško u ovim vremenima, ali radimo na tome, jer će to doprinijeti većoj citiranosti. Ne smijemo odustati i svima kojima je stalo do našeg časopisa upućujemo poziv da nam šalju radove, jer bez Vas nema časopisa. Moramo se zajednički potruditi da naša hrvatska golupka (*Hemaris croatica*) i dalje živi.

Vaša
Paula Durbešić

Dear readers!

This issue presents five original scientific papers in which you can find interesting information about Croatian entomofauna: Mantodea, Coleoptera (Buprestidae, Coccinellidae and Scarabaeidae) and Lepidoptera.

They have been written by Croatian, Slovenian and Polish authors. We have also included a professional paper about jumping spiders, in which the way in which they gather is interestingly described.

A valuable contribution to this issue is also a readily comprehensible scientific paper in which a list of Orthoptera of the entomological collections of the Division of Zoology of the Faculty of Science in Zagreb is given. Please also read our interesting and significant news.

We have invested a lot of energy as well as good will in this issue. We are currently working on an online version of the journal. This would be a big step for the publication, but it will require greater financial resources. This is difficult in these times, but we will try, as this will contribute to the journal being cited more frequently. We must not give up, and we ask all those who care about the journal to send us their work, because without your contributions there can be no journal. A joint effort is required from us to keep our *Hemaris croatica* viable.

Sincerely Yours,
Paula Durbešić
