

PREGLED STRUČNOG KADRA ZA PREPARATORSKE I KONZERVATORSKO-RESTAURATORSKE RADOVE U SFR JUGOSLAVIJI

SURVEY OF SPECIALIZED PERSONNEL FOR PRESERVATION, CONSERVATION, AND RESTORATION IN YUGOSLAVIA

Ovaj pregled kadra za prepariranje, konzerviranje i restauriranje u pokretnih kulturnih dobara, zidnih slika i mozaika izradjen je u Muzejskom dokumentacionom centru u Zagrebu, na bazi podataka u odgovorima na poseban upitnik koji je bio upućen 1978. godine odgovarajućim institucijama u našoj zemlji.

Primljeni podaci zbog bolje preglednosti sistematizirani su i iskazani podjelom na republike i autonomne pokrajine. Unutar njih razvrstan je kadar prema djelatnostima: muzejskoj djelatnosti, službi zaštite spomenika kulture, arhivskoj službi i bibliotečnoj djelatnosti, uz navodjenje alfabetskim redom lokaliteta i institucija u kojima takvo osoblje radi. Za svakog je pojedinca uz struku i zvanje naznačena i njegova specijalnost, odnosno uže područje rada, ukoliko su ti podaci bili u odgovorima navedeni.

No treba napomenuti da ovaj pregled, iako pokazuje brojnost i profil specifičnih stručnih radnika, ne može dati potpuno cjelovit prikaz za cijelu našu zemlju, s obzirom na to da dio institucija nije pravovremeno odgovorilo na upitnik. Unatoč tome i u ovom opsegu obradjeni pregled može biti koristan izvor informacija svima zainteresiranim.

This survey of specialized personnel in the field of preservation, conservation, and restoration of cultural property, mural paintings, and mosaics was worked out in the Museum Documentation Centre in Zagreb and was based on answers to a questionnaire sent to the corresponding institutions in our country.

For the sake of clarity, the obtained information was classified and expressed according to the division into republics and autonomous provinces. Within this division the personnel was classified according to the activities carried out: in museums, in the protection of historic monuments, in archives, and in libraries. Note has also been made of the localities and institutions each individual is working in, in alphabetical order. Besides their professions and occupations, the specialities or actual fields of work have been given, as far as they were mentioned in the answers.

It should be mentioned that although the number and kind of specialized workers has been presented, this survey cannot reflect the state in the whole of our country since several institutions failed to send in their answers in time. Nevertheless, the survey such as it is may be a valuable source of information.
