ASEC 2015

In spring of this year, from the 13th to the 15th of May, 2015, SPE Student Chapter Croatia was host to the second edition of the Annual Student Energy Conference. By organizing this event, our main goal is to bring together students, young professionals and experts from different parts of the world to discuss the latest achievements and ideas related to the Oil and Gas Industry. Our second goal is developing international relations between SPE Student Chapters and Colleagues worldwide, as well as entertainment activities which further enhance friendship among Chapters.

Along with the official part of the Conference, promoting the Croatian industry and natural beauty is among the top priorities of our programme. Our participants had an opportunity to visit the INA Oil Refinery located near Rijeka, Mine Zrinski, Plitvice Lakes and other auxiliary locations.

ASEC 2016

From the 9th to the 11th of March, 2016, SPE Croatian Student Section is proud to host another (3rd) edition of the Annual Student Energy Conference (ASEC 2016). The organization of this great event has already started and we are working on bringing even more students from all around the world. For this year, we are introducing some novelties in order to improve negotiation and debating skills among students and professionals (i.e. workshops and open debates). University experts from four different countries have already confirmed their attendance and will present their latest projects. We will again merge both educational and entertaining activities which will surely, benefit both academic and professional participants.

Student Projects

With the initiative of the current Board, Chapter started to develop strong links between students and industry, as well as with scientific research. Even though only one month has passed, interest among students has risen greatly. Even more, one project has already been approved by the Faculty Board and is proceeding while others are in the development phase. Due to the increase in Chapter's activities, the number of members has doubled in less than one month.

Chapter's Board is constantly promoting the Faculty at an international level by visiting conferences and workshops abroad. The latest events we attended were the ATCE 2014 in Amsterdam, East Meets West 2015 in Krakow and the University of Leoben Anniversary this year. Further, Chapter's Representatives will participate in the Regional SPE meeting in Istanbul, Turkey in October and in the International Petroleum Technical Conference (IPTC 2015) to be held in December this year in Doha, Qatar.

However, Chapter is constantly seeking new Members who will be given an opportunity to bring Chapter to a higher level by sharing their ideas and suggestions. Valuable experience is guaranteed.
