

Subject Index: CIT Vol. 6 (1998), N° 1-4

- Active contours, 191
 Adaptive hypermedia, 27
 Adaptivity, 233
 Anatomical model, 95
 Artificial neural networks, 117, 425
 Assembly, 1
 Audio, 311
 Audio and video communications, 285
 Bayesian methods, 107
 Branch-and-bound, 373
 Breast cancer, 425
 British Open University, 337
 CAI, 63
 Cardiac MRI, 215
 Case based search and retrieval, 13
 Clusters of microcalcifications, 425
 Combinatorial optimization, 373
 Composition, 297
 Computer-aided diagnosis, 425
 Computer assisted language learning, 39
 Computer-user interface, 325
 Computer vision, 117
 Conceptual graphs, 39
 CSCW, 73
 Deformable models, 215
 Deformation analysis, 449
 Desktop video conferencing, 285
 Digital mammography, 425
 Digital subtraction angiography, 165
 Direct detection, 425
 Discrete Karhunen-Loeve transform, 95
 Distance learning, 53, 337
 Distributed processor/memory nodes, 359
 3D anatomical point landmarks, 435
 3D differential edge intersection approach, 435
 3D differential operators, 435
 3D discrete topology, 149
 3D medical images, 181
 3D shape modeling, 449
 4D ultrasound imaging, 463
 Education, 1
 Educational computing, 325
 Educational hypermedia, 27
 Educational multimedia, 53
 Eigenvector transform, 95
 Empirical analysis, 373
 Endocardial surface, 449
 Energy, 165
 Forward error correction (FEC), 255
 Free form surfaces, 449
 Fuzzy object extraction, 215
 Global optimisation method, 181
 Handwritten Bengali character recognition, 395
 Heart imaging, 463
 Hierarchical structure, 395
 Hotelling transform, 95
 Human computer interaction, 53
 Hypermedia, 383
 Hypertext, 383
 Hyperwave, 63
 Image guided surgery, 165
 Image registration, 165
 Image segmentation, 117
 Indirect detection, 425
 Information representation, 297
 Information retrieval, 383
 Instrumentation technology, 463
 Integer programming, 373
 Intelligent tutoring systems, 27, 39
 Interactivity, 1
 Intermediate description languages, 13
 Internet, 273
 Internet broadcasting, 245
 IP multicast, 245
 IP simulcast, 245
 IP unicast, 245
 Knowledge representation, 117
 Language, 297
 Layered architecture, 255
 Likelihood, 107
 Link destination, 383
 Mammograms, 425
 MBone, 273
 Media selection, 343
 Mediation, 343
 Medical image processing, 149
 Medical images, 117, 191
 Metadata, 297
 Microprocessor, 1
 MLP network, 415
 Multimedia, 273, 325
 Multimedia document models, 233
 Multimedia information systems, 311
 Navigation support, 27
 Neural networks, 415
 News video, 297
 Object-oriented databases, 73
 Obligation, 343
 Orthopaedics, 191
 Parallel Architectures, 359
 Pattern intensity, 165
 Point distribution models, 107
 Preserving topology, 149
 Principal component transform, 95
 Process network synthesis (PNS), 373
 Program editors, 13
 Projection, 89
 Prolog techniques, 13
 Radial basis function neural-network, 135
 Radio broadcasting, 245

Radiological path, 89
Reconstruction, 89
Region of interest coding, 203
Reliable multicast, 255
Resource estimation, 359
Retrieval, 297
Rotating probe, 463

Scalability, 255
Scoliotic spine, 449
Segmentation of coronary arteries, 135
Selective image compression, 203
Self-organizing map, 415
Semantic content-based multimedia models, 311
Semantics, 311
Similarity measure, 165
Simulation, 1
Single modality, 165
Speaker identification, 415
Spherical harmonics, 449
Structural model, 373
Student model, 27
Subvoxel localization, 435
Synchronization, 233
Syntactic recognition, 395
Syntax, 311

Teaching, 63
Technology transfer, 53
Telecooperation, 273
Tele-learning, 337
Telepresentation, 255
Television broadcasting, 245
Terminology knowledge processing, 39
Text or document passage, 383
Thinning algorithms, 149
Time-dependent representation, 449
Tissue orientation, 95
Total knee replacement (TKR), 191
Training, 63
Transaction management, 73
Two-level classifier, 415

Video, 311
Videoconferencing, 273
Virtual machines, 1
Volume registration, 181
Volume visualization, 215

Wavelet image compression, 203
Web-based learning, 63
Webcasting, 245
Workflow, 73
WWW for education, 63
