

TRANSACTIONS

of FAMENA

Contents

An Energy Efficient Turning Process for Hardened Material with Multi-Criteria Optimization Hong-Seok Park, Trung-Thanh Nguyen, Jin-Chun Kim	1
A Model for Predicting Motor Vehicle Life Cycle Cost and its Verification Jan Furch.....	15
Design, Meshing Characteristics and Stress Analysis of Cylindrical Gears with Curvilinear Tooth Profile Xuegang Zhang, Yongchun Xie, Xingqiang Tan	27
The Effect of Mixing Time on the Homogeneity of Multi-Component Granular Systems Jolanta B. Krolczyk.....	45
Measurements of Air Concentration and Velocities in a Free Falling Water Jet Freddy Florez, Reinhard Prenner, Norbert Krouzecky	57
Application of the Modified Weakly Compressible SPH Method to the 3D Turbulent Wave Breaking Impact Mahmoud Rostami Varnousfaaderani, Mohammad Javad Ketabdari	69
A Necessity-Based Method for Product Requirement Elicitation and Classification Špela Brglez, Bojan Dolšak	87
Professional papers	
Finite Element Analysis of Heating-Cooling Systems Used for Laminating Tools Emilian-Ionut Croitoru, Daniel Magurian, Gheorghe Oancea.....	111
Research on the Influence of Ultrasonic Vibrations on Paint Coating Properties Alexey Nikolaevich Livanskiy, Vyacheslav Mikhailovich Prikhodko, Sergey Konstantinovich Sundukov, Dmitriy Sergeevich Fatyukhin	129
News	
In memoriam Professor Ivan Esih
