Riječ je o iznimno grafički dotjeranom podsjetniku iz područja ehokardiografije koji na prvi pogled osvaja praktičnim, džepnim formatom. Uredili su ga prof. Lancellotti (voditelj Europskog udruženja za kardiovaskularno oslikavanje u mandatu od 2012. do 2014. godine) i prof. Cosyns (voditelj Nukleusa Ehokardiografske sekcije pri Europskom udruženju za kardiovaskularno oslikavanje). Za moderan način prezentacije koji će pomoći učenju vještine ehokardiografskog pregleda, uz 30 vodećih eksperata, odgovorno je i pet urednika sekcija (prof. Donal, dr. Garbi, dr. Jurcut, dr. Monney i prof. Šeparović Hanževački).

Strukturu knjige čini 17 poglavlja koja slijede logiku svakodnevnog rada u ehokardiografskom laboratoriju. Izvršna razrada pojedinih problemskih cjelina kojima se na logičan i lako razumljiv način integriraju opsežna znanja iz stručne literature korak je naprijed važan za edukaciju svakog internista i kardiologa iz područja kardiovaskularnog oslikavanja.

This well-polished echocardiography field guide is immediately attractive due to its practical pocket-size. It is edited by Prof. Lancellotti (Head of the European Association of Cardiovascular Imaging in the 2012-2014 term) and Prof. Cosyns (Nucleus Head of the Echocardiographic section of the European Association of Cardiovascular Imaging). The modern presentation that will help train the skills used in

echocardiographic examinations is the result of the efforts of 30 leading experts and five section editors (Prof Donal, Dr Garbi, Dr Jurcut, Dr Monney, and Prof Šeparović Hanževački).

The book is structured into 17 chapters that follow the logic of everyday practice in an echocardiographic laboratory. The elaboration of individual thematic areas is excellent, integrating extensive insights from the expert literature into a logical and easily-intelligible way, and represents a step forward that is important to the education of every internist and cardiologist in the field of cardiovascular imaging.
