## SUMMARY

### **ON FORGERIES OF ONE-GULDEN BANKNOTES ISSUED BY THE AUSTRIAN NATIONAL BANK ON 1 JANUARY 1858**

Numismatic catalogues and literature note examples of forged Austrian gulden banknotes issued in the late 18<sup>th</sup> and especially in the 19<sup>th</sup> century. Forged banknotes of this kind are owned by museum and private numismatic collections. The forgeries were made by drawing, in smaller amounts, and by printing procedures, in larger amounts, although forging money was strictly sanctioned by law. The examples of forged one-gulden banknotes (issue 1 January 1858), made both by drawing and printing, are interesting because of the time when they were made and circulated, and also because of their quality. The article shows the characteristics of these forgeries.
