

CROATICA
CHEMICA ACTA

Croat. Chem. Acta Vol. 62 No. 2B

279—440 (1989)

Zagreb, August 10, 1989

CONTENTS

The contents of CCA may be reproduced, citing the original form, in any medium without prior permission

- Exciton Optical Activity of Molecules Containing Three and Six Coupled Oscillators Belonging to C3 and D3 Point Groups: Applications to Cyclotrimeratriylenes and Cryptophanes
 . . . André Collet and Giovanni Gottarelli 279—292
- Circular Dichroism as a Tool of Investigation in the B-Z Transition of DNA . . . Franco Quadrifoglio, Sabina Cauci, Luigi Emilio Xodo, and Giorgio Manzini 293—300
- Intramolecular Exciton Coupling and Induced Circular Dichroism From Bilirubin-Ephedrine Heteroassociation Complexes. Stereochemical Models for Protein Binding . . . Yu-Ming Fu and David A. Lightner 301—324
- Attempted Diastereoselective Preparation and Chiroptical Properties of (2S)-1-(3-Mercapto-2-Methyl-1-Oxopropyl)-L-Proline (Captopril) and Some Congeners . . . G. Snatzke, E. Decorte, T. Kovač, F. Moimas, I. Habuš, and V. Sunjić 325—337
- Circular Dichroism and Absorption Spectra of Mono- and Di-Amino-acridines Complexed to DNA . . . Daniel Fornasiero, Tomas Kurucsev, Reidar Lyng, and Bengt Nordén 339—349
- Metal Ion Dependence of the Asymmetric Transamination of Phenylpyruvic Acid by Pyridoxamine in the Presence of β -Cyclodextrin . . . L. Casella, M. Gullotti, F. Piemontesi, and A. Pintar 351—358
- Chiroptical Properties of Anilides of (+)- β -Methylhydrocinnamic Acid . . . Valeria M. Demyanovich and (late) Victor M. Potapov 359—367
- Chiroptical Properties and Absolute Configuration of Chiral, Open Chain Di- and Tri-substituted Allenes: A Polarizability Approach . . . Carlo Rosini, Maurizio Zandomeneghi, and Piero Salvadori 369—376
- Calculations of Cotton Effects in the Vacuum UV Region for Chiral γ -Lactones and Correlations with the Absolute Stereochemistry . . . Yoshihiro Nishida, Hiroshi Ohru, Hiroshi Meguro, and Toshio Konno 377—389
- Calculations of Cotton Effects in the Vacuum UV Region for Aldonic Acid 1,4-Lactones and Interpretations of Hudson's Lactone Rule . . . Hiroshi Meguro, Yoshihiro Nishida, Hiroshi Ohru, and Toshio Konno 391—400
- Internal and External Induced Circular Dichroism in Cyclodextrin Complexes: A Study of the Complexes of α -Cyclodextrin with (R)-3-Methylcyclopentanone and Cyclopentanone . . . M. Boisvin, A. Rassat, G. Le Bas, and G. Tsoucaris 401—409
- Synthesis of Some Optically Active α -Pyridyl-carbinols and Determination of Absolute Configuration from the CD of Their *in situ* Complexes with $[\text{Mo}_2(\text{OAc})_4]$. . . Nikolina Berova, Stefan Bojadzjev, Rosiza Rakovska, Jadwiga Frelek, and Günther Snatzke 411—421
- Synthesis of Aryl-sulphinyl Acetic Acids and Sulphoximides, and CD of their *in situ* Complexes with $[\text{MO}_2(\text{OAc})_4]$. . . J. Drabowicz, M. Mikołajczyk, and G. Snatzke 423—427
- The *A Priori* Prediction of Vibrational Circular Dichroism Spectra: A New Approach to the Study of the Stereochemistry of Chiral Molecules . . . Philip J. Stephens 429—440
