

XXTH EUROPEAN CONGRESS ON MOLECULAR SPECTROSCOPY (EUCMOS XX)

Zagreb, Yugoslavia

August 25—30, 1991

The International Committee of the European Congress on Molecular Spectroscopy honoured our country for the first time to organize a EUCMOS meeting. Jubilean XXth EUCMOS will be held in Zagreb, the capital of Croatia.

Zagreb is an important cultural and scientific center on the South-East of Europe. Its University, which has more than 40.000 students, just celebrated its 320th anniversary. The Yugoslav Academy of Sciences and Arts, as well as the research Ruđer Bošković Institute — a center of excellence in natural sciences — are placed in Zagreb. Hence we are confident that Zagreb will be a good host-city to participants of the meeting.

The Organizing Committee of EUCMOS XX is pleased to invite you to attend the XXth European Congress on Molecular Spectroscopy, which will be organized by the Ruđer Bošković Institute and held in Zagreb, Yugoslavia from August 25—30, 1991.

SCIENTIFIC PROGRAMME

The scientific programme for the Congress will consist of a number of sections with plenary and invited lectures, oral contributions and poster sessions.

FURTHER INFORMATION

The further information concerning scientific programme, procedure for submission of papers (posters), conference costs and social programme will be mailed in summer 1990. For more information on EUCMOS XX please refer to:
