

CROATICA CHEMICA ACTA **69** (3) (1996)

The Fourth Croatian-Slovenian
CRYSTALLOGRAPHIC MEETING
Trakošćan 1995

FOREWORD

As it has been agreed between the *Croatian Crystallographic Association* and the *Slovenian Crystallographic Society*, joint annual scientific meetings of crystallographers of both countries are held alternately in Croatia and Slovenia. Also, when held in Slovenia, conference papers based upon the general lectures will be published in *Acta Chimica Slovenica* and when held in Croatia in *Croatica Chemica Acta*. Such an agreement was generously supported by the *Editorial Board* of *Croatica Chemica Acta* (cf. *Croat. Chem. Acta*, 67 (1994) 233).

Thus, the *Third Slovenian-Croatian Crystallographic Meeting* was held at Kranjska Gora, on September 29–30, 1994. The four plenary lectures were given by Professor W. Fuller *et al.* (Keele), Dr. T. Schirmer (Basel), Dr. A. Rečnik (Ljubljana), and Dr. M. Luić and Dr. N. Brničević (Zagreb) and 51 scientific communications were presented by the crystallographers of both countries.

The Fourth Croatian-Slovenian Crystallographic Meeting was held at Trakošćan, from September 28th to 30th, 1995. Forty-two scientific papers were presented, including the following four plenary lectures:

Professor Hartmut Fuess (Darmstadt), *Contributions of crystallography to materials science*;

Professor Velibor Marinković (Ljubljana), *Scanning tunneling microscopy of surface structures*,

Professor István Hargittal and Professor Magdolna Hargittai (Budapest), *Structure of molecules and assemblies*,

Dr. Davor Balzar (Zagreb), *Diffraction line broadening – nuisance or lattice-imperfections fingerprints*.

This issue of *Croatica Chemica Acta*, therefore, includes four papers presented as plenary lectures at the *Fourth Croatian-Slovenian Crystallographic Meeting*. My thanks go to all authors and, once again, to the *Editorial Board* of *Croatica Chemica Acta*.

B. Kamenar
