

## INSTRUCTIONS TO AUTHORS

CROATICA CHEMICA ACTA publishes *Original scientific papers, Notes, Preliminary communications, Author's reviews, Reviews, Feature articles, Conference papers and Data bank contributions* written in English, with an abstract in Croatian. In the appendix the Journal publishes book reviews, obituaries and society news. The submission of the paper obliges the author not to submit the same material elsewhere.

*Original scientific papers* report unpublished results of original research. The papers have to contain all necessary information to enable the reproduction of the described work.

*Notes* report unpublished results of short, but completed, original research or describe original laboratory techniques (methods, apparatus, etc.). Notes should not exceed 1000 words.

*Preliminary communications* report unpublished preliminary results of original research which require rapid publication.

*Author's reviews* are concise and critical surveys of the author's current research field. The author's contribution should be described relative to contributions of other scientists in the same field.

*Reviews* are concise and critical surveys of a specific research field, providing the reader with an up-to-date information on current developments and trends. As a rule, reviews are written upon invitation by the Editor.

*Feature articles* are concise and critical reviews of a current topic, pointing to trends and controversies in the field. Feature articles should be understandable to non-specialists. Feature articles are written upon invitation by the Editorial Board, and should not exceed 20 typewritten pages.

*Conference papers* should be reported at a congress, symposium or summer school prior to submission to the Journal. Conference papers are submitted by the Organizing Committee.

*Data bank contributions* contain new chemical and physical data in order to make them available for subsequent scientific interpretation and various practical uses.

The papers should be written in the shortest possible way the clearness permits. In the *introduction*, only the necessary minimum of previous work directly connected with the present one should be described. The aim of the research should also be given in the introduction.

The *experimental part* (description of materials and methods used) should be written as a separate section of the paper. Well known methods and techniques should not be described in detail, but only quoted by their names and/or references.

The description of experimental results and other data has to be very precise and clear. The results should preferably be given separately from the *discussion* (this rule need not be observed in notes and preliminary communications).

*Refereeing of manuscripts:* Original scientific papers, Notes and Preliminary communications are sent to two referees, Feature articles and Conference papers to one, and Author's reviews, Reviews and Data bank contributions to three. The referees are chosen among scientists active in the narrow field the paper belongs to. The authors may suggest the referees themselves, but the Editorial Board reserves the right to choose other referees who remain anonymous. Only papers with favourable reports are accepted for publication.

**Detailed Instructions to Authors are printed in the first issue of each volume and may be found on the WWW under <http://pubwww.srce.hr/ccacaa>**
