

DOCUMENTA CHEMICA YUGOSLAVICA
is a journal of the Chemical Society of the Socialist Federal Republic of Yugoslavia. It is published quarterly by the Institute of Chemistry and Technology of Materials of the Ministry of Science and Technology of the SFRY. The journal is devoted to the publication of original research papers, reviews, and short communications in all fields of chemistry. It is intended for chemists and other scientists interested in the development of chemistry in Yugoslavia and abroad.

UPUTE AUTORIMA

CROATICA CHEMICA ACTA objavljuje izvorne znanstvene radove, bilješke, prethodna saopćenja, autorske pregledi i referate sa znanstvenih skupova, napisane na engleskom, francuskom, njemačkom ili ruskom jeziku, sa sažetkom na jednomu od jezika naroda Jugoslavije. U prilogu časopis donosi prikaze knjiga, nekrologe, društvene vijesti, sažetke doktorskih disertacija i magisterskih radova (na engleskom jeziku) i bibliografiju kemijskih radova za SR Hrvatsku.

Izvorni znanstveni radovi sadržavaju neobjavljene rezultate izvornih istraživanja, a treba da budu napisani tako, da se na temelju podataka u njima mogu reproducirati načinjeni eksperimenti. Prihvatanje rada obvezuje autora da iste rezultate neće drugdje objaviti.

Bilješke (kratka priopćenja) sadržavaju rezultate kraćih ali dovršenih istra-

živanja ili se pak u njima iznose vlastita izvorna iskustva iz laboratorijske prakse (metodika, aparature i sl.). Njihov opseg neka ne prelazi 1000 riječi.

Prethodna priopćenja treba da sadržavaju znanstvene spoznaje i rezultate čiji karakter zahtjeva hitno objavljanje.

Autorski pregledi treba da budu izvorni, koncizni i kritički prikazi osobito aktualnih istraživačkih područja na kojima autor radi. U takovom pregledu treba da jasno dođe do izražaja uloga autorovih radova na tom području, u odnosu na radove drugih, a također i autorovi vlastiti, izvorni stavovi i mišljenja.

Referati sa znanstvenih skupova (konгреса, симпозија, лjetnih школа итд.) objavljaju se u dogовору s organizatorom koji treba da dostavi cijelokupan materijal dotičnog skupa.
