

ANNOUNCEMENT

FIRST ANNOUNCEMENT

VII International Summer Conference

CHEMISTRY OF SOLID/LIQUID INTERFACES

including two specialized symposia

1. *The Electrochemical Double Layer: Status of Theory and its Application*
and
2. *Interfacial Phenomena in Biomineralization*,
The Islands of Brioni, June 25—July 3, 1986

The Conference will be held at the facilities of the islands of Brioni (near Pula), Istria, Yugoslavia. Main topics, presented by invited lecturers, will deal with a broad range of electrochemical colloid and surface chemistry problems including interfacial phenomena in biological mineralization, considering model systems, theory and applications. Ample discussion time will be provided.

The Conference and its associated symposia are an integral event and participants are encouraged and expected to engage in this interdisciplinary exercise by active participation through discussion and poster presentation.
