

ERRATA

Models of Internal Viscosity of Polymers [*Croat. Chem. Acta* **50** (1977) 253—269] by *A. Peterlin*.

On page 264, line 13, the word »to« has to be changed into »not« so that the sentence reads: »... Hence a physical meaning can be associated with this product only and not with $\Phi^{(u)}$ alone.

Structural Component of the Disjoining Pressure of Thin Layers of Liquids [*Croat. Chem. Acta* **50** (1977) 187—195] by *B. V. Deryaguin and N. V. Churaev*.

On page 188 in the first sentence of the second paragraph the words »the free energy of the Gibbs system« have to be changed into »the Gibbs free energy of the system«.

On page 189 the second paragraph: »... Dependent on the sign of $\Delta F = \Delta U - T \Delta S$ (where ΔU and ΔS are changes in the internal energy and entropy, respectively; T is the Kelvin temperature), the overlapping may lead to the appearance of repulsion forces ($\Pi_s > 0$) or attraction forces ($\Pi_s < 0$)...« should read »... Dependent on the sign of M_s , the overlapping may lead to the appearance of repulsion forces ($\Pi_s > 0$) or attraction forces ($\Pi_s < 0$).«
