CHEMISTRY OF INTERFACES****STATE OF INTERFACIAL REGIONS AND  
INTERACTIONS IN HETEROGENEOUS SYSTEMS**

Port-Barcarès—FRANCE

26—30 April 1976

Chairman: Dr. L. TERMINASSIAN-SARAGA

President: Prof. H. BENOIT

Cochairman: Prof. A. PACAULT

Ordering in bulk will be discussed — as an example — for two particular gel systems.

The solid-liquid and solid-solid contact formation and rupture may depend on the chemical nature of the surfaces.

The ordering of the liquid interfacial regions are relevant to electrode processes, thin liquid films stability, orientation of liquids crystals and solid-solid contacts in liquid media. This problem of ordering is still an open one -which will be brought up for discussion.

Dynamic processes at interfaces and in bulk will be discussed.
