

**PROCEEDINGS**  
**OF THE INTERNATIONAL SUMMER SCHOOL**

**THE CHEMISTRY OF**  
**SOLID / LIQUID INTERFACES**

Dubrovnik - Cavtat, Yugoslavia  
June 23—July 4, 1969

The Summer School on the *Chemistry of Solid/Liquid Interfaces* was sponsored by the

*Yugoslav Federal Council for Scientific Research,  
Council for Scientific Research of the Republic of Croatia,  
Yugoslav Federal Nuclear Energy Commission,*

and organized by the »*Ruđer Bošković*« Institute, Zagreb represented through

B. Težak (Chairman), V. Pravdić (Scientific Secretary),

M. Branica, M. Mirnik, and V. Škarić (Director of the Institute).

*Editor's note*

*The present volume is a record of the Cavtat Summer School. Authors have been asked to submit papers of any extent they considered appropriate and all those have been published as submitted. The character, type, and extent of a paper does not, therefore, indicate any preference given to it from the viewpoint of the Editorial Board.*

*The Organizing Committee and the »Ruđer Bošković« Institute are expressing their thanks to all the Invited Lecturers for their contributions. Without their enthusiastic support the School would never have been successful. But thanks are also due to some of our »quiet« collaborators, of whom I have to mention Mrs. L. Đačić, B. A., Mrs. D. Čukman, B. Sc., Mr. A. Barić, M. Sc., and last not least, Miss Z. Talijić, B. A. of the »Atlas« Travel Agency.*
