SKUPNI NALAZI NOVCA IZ HRVATSKE
XIV. SKUPNI NALAZ ZLATNOG I SREBRNOG NOVCA
16. ST. IZ SVINJAREVACA

UDK 737.122.1/2 (439.24) »15«
Izvorni znanstveni rad

Pisci obrađuju jedan od najznačajnijih skupnih nalaza zlatnog i srebrnog novca 16. st. Osmanskog Carstva (filuri i akče) i europskih država (taliri), do kojeg je slučajno došlo 1881. god. u Svinjarevcima. Prvi je o tome blagu pisao Šime Ljubić iste 1881. god., no do danas ostava nije objelodanjena u tančine.

O Svinjarevcima (Orolik, Vinkovci) malo prije nalaska zakopanoga blaga, Vinko Sabljara, brat zaslužnog majora Mijata Sabljara, pisao je sljedeće: *SVINJAREVCI, s.u.ž. Srijem., k: Tovarnik, pšt: Orolik, bilj: Berak, sdč. za se; 95 kuć. 500 st. (50 nem. 115 mgj. 5 in nar.) – 495 rkž: Jankovci stari 5 židov.* (SABLJAR 1866: 411). God. 1895. stanje bilo je sljedeće: Svinjarevci bili su selo s pučkom učionicom, kuća bijaše 148, stanovnika 760, potpadalo je pod rimokatoličku župu u Starim Jankovcima i grkoistočnu u Negoslavcima; pokrivalo je površinu od 2.219 jutara i 1.270 hvati. Potpadali su pod upravnu općinu Negoslavci, upravnog kotara Vukovar, u županiji Srijemskoj (*Razdieljenje* 1895: 200). U Korenčićevoj knjizi možemo slijediti porast broja stanovništva: 1857. god. – 500, 1869. god. – 610, 1880. god. – 691, 1890. god. – 760, 1900. god. – 726, 1910. god. – 771, 1921. god. – 760, 1931. god. – 810, 1948. god. – 851, 1953. god. – 838, 1961. god. – 917, 1971. god. – 956 (KORENČIĆ 1979: 746).

Kao arheološko nalazište Svinjarevci postali su poznati zahvaljujući Nuberovim iskopavanjima starohrvatskoga groblja, a u nekim grobovima nađeni su ugarski denari kraljeva Bele I (1048–1063) i Ladislava I (1077–1095) (BRUNŠMID1904 : 87–90; MIRNIK 2002: 110, 113; 2004: 217).

Karta 1. (Kilometričke karte, 1894)

Skupni nalaz novca iz Svinjarevaca prvi je opisao Šime Ljubić 1881. god. sljedećim riječima:

Numismatičko otkriće u Svinjarevcima. – Dne 29. lipnja t.g. Luka Parmanac, čoban iz Svinjarevaca, iduć brežuljkom nazvanim vlaško groblje, ležećim uz cestu, koja iz Svinjarevaca polazi u Orolik, po svoj prilici kilometar daleko od Svinjarevaca, na desnom obronku one visočine, a upravo na njivi Josipa Rikarda, opazi na tlu razbacano nekoliko sitnih srebrnih novaca. Pokupi ih nješto njih, pohiti do Ivana Petkova čobana tu na blizu ležeća u groznici, da mu jih pokaže. Nadošav međutim Grgo Ambruš također onomjestrni čoban, ovaj po nagovoru Petkovu donese motiku, te se stavi kopati, gdje mu Parmanac bilježio. Jedva posegnuo do pol druge stope u dublini, kad evo čupe pune zlatnih dukata i srebrnih novaca. Po izpovjedi Luke Parmanca, isti Luka i Grgo kao rođena braća podjeliše medju sobom otkriveno blago, tako da svaki od njih dobi po 51 talir i 52 dukata. Prečastni g. Seb. Riesel župnik u starih Jankovcima na prvu viest, koja mu dodje o tom otkriću, obavijesti namah (1 srpnja) o svem presv. g. vel. župana u Vukovaru, koj još sutradan odpravi podžup. perovodju g. M. Nikolajevića u Svinjarevce, da dotičnu istragu povede i novce pokupi. Medjutim Parmančev dio onoga blaga hode u razne ruke, a Grgo veću stranu svoga, valjda iz straha da mu neizmakne, opet zakopa. Nikolajeviću podje za rukom pobrati jedva 48 zlatnih dukata, 55 sr. talira, 4. sr. forinta i 50 komada sitnoga novca.

Od 48 zl. dukata 29 spada na turskoga cara Solimana II (1520 do 66), 9 na magjarske vladare Matijaša, Ladislava i Ivana Sigmunda (1458 do 1558), jedan od Solnogradskoga nadbiskupa Leonarda (1518), a 9 na mletačke duždeve Andriju Gritti, P. Lando, Fr. Donato, M.A. Trivisano,

Fr. Venerio i L. Priuli (1523–59). Srebrni taliri i forinti svi su od raznih nemačkih vladara, koji su uživali pravo kovati svoje vlastite novce prvom polovicom XVI stoljeća te do g. 1567. Sitni su veoma zločesto sačuvani, te su nerazumljivi, ali se čini da su to ondašnji turski dinari.

Istraga nije žalibože provedena kako što zahtjeva vladina naredba od 25 studenoga 1880 br. 3302, te toga radi nije se u trag došlo ni polovici našastoga blaga. Ono pako, što se je spasilo, došlo je putem Vis. Vlade muz. Ravnateljstvu na ocienu. Tvarna vrijednost ovih novaca neprelazi 344 for. Duplikata ima veoma malo, te tako dobro će doći arkeol. Muzeju, pošto će izpuniti mnogu prazninu u numismatičkoj sbirki onoga doba.

Sudeć po ovih komadnih poklad je ovaj postavljen bio za rata sa Turci, koj svrši mirom od 17. veljače 1568. Najmladji novac jest od god. 1567 i to Henrika kneza Braunschweigskog, koj umrie god. 1568.

Vis. Kr. Zem. Vlada, da tu dosta važnu sbirku zemlji spasi, blagoizvolila je veledušno po predlogu muzeal. Ravnateljstva sve te novce odkupiti, te istomu ravnateljstvu naložiti, da jih u muzealni imovnik vrsti. (LJUBIĆ 1881: 122–123)

U znanstvenoj literaturi ta je ostava spominjana i poslije (MIRNIK – ŽDRALOVIĆ 1974: 121), a predočen je i sumarni popis sačuvanog novca (MIRNIK 1981: 135–136, br. 658). Skupni nalazi novca 16. st. u panonskom dijelu Trojednice prilično su brojni i omogućuju nam neke zaključke u svezi s nevjerojatno raznolikom valutom u optjecaju, a neprekidni ratovi s Osmanlijama lako su bili uzrokom skrivanja novca. Zlatnici su nađeni u nekoliko ostava: Crnac (1893; MIRNIK 1981: 127, br. 613), Daruvarski Brestovac (?1893; MIRNIK 1981: 128, br. 615), okolica Donjeg Miholjca (1899; MIRNIK 1981: 129, br. 620), okolica Gline (MIRNIK 1981: 129, br. 623), Lepavina (1885; MIRNIK 1981: 131, br. 635), Opatinec (1973; MIRNIK – ŽDRALOVIĆ 1974; MIRNIK 1981: 132, br. 645), Sirač (c. 1909; MIRNIK 1981: 135, br. 655), Veliki Zdenci (1932; MIRNIK 1981: 137, br. 666), Veljun (1919; MIRNIK 1981: 137, br. 667), a talira je bilo u skupnome nalazu iz Filipovca (1888, MIRNIK 1981: 129, br. 621), Gundinaca (1891; MIRNIK 1981: 130, br. 627), Klještevica (c. 1901; MIRNIK 1981: 131, br. 631), Opatinca (1973; MIRNIK – ŽDRALOVIĆ 1974; MIRNIK 1981: 132, br. 645) te Osijeka (1934; KLEMENC 1936: 131, br. 36; LOEHR 1940; MIRNIK 1981: 132–133, br. 646; 1991:).

Novac Otomanskog Carstva svodi se na srebnike i zlatnike Bajazida I (jedan primjerak), koji je ujedno najstariji komad novca u ostavi, Selima I (jedan primjerak) i Sulejmana II Veličanstvenog (56 primjeraka), iskovane u više kovnica diljem cijeloga carstva. Filuri su odlično otkovani i sačuvani, dok su akče ne samo nepravilnog oblika, površno iskovane, izlizane ili korodirane, već katkada i probušene. Stoga su se pri njihovom određivanju mogle potkrasti greške, a jednako tako zbog višekratne selidbe zagrebačke numizmatičke zbirke. Naime, potkraj 1945. god., prigodom pakovanja sustavne zbirke u pojedine papirnate vrećice Ivica Degmedžić stavljala je po desetak primjeraka novca skupa s odgovarajućim ceduljicama, a budući da novac nije bio ni vagan ni izmjerena promjera, to je u skupinama moglo izazvati poremećaje tako da određeni primjerak novca bude uz ceduljicu nekog drugoga primjerka. No, u krajnjoj liniji to ne znači mnogo, jer su u vrećice pakirani slični, odnosno jednaki primjerci novca. S kronološkog stanovišta, otomanski novac ne daje neke posebne podatke, jer je na taj novac naznačivana godina nastupa prijestolja pojedinog sultana, u ovome primjeru 1481. (886. po Hidžri) god. na novcu Bajazida I, 1512. god. (918. po Hidžri) na novcu Selima I, a 1520. ili 1521. (926. god. po Hidžri) na novcu Sulejmana II Veličanstvenog.

Posebno su zanimljivi taliri i polutaliri brojnih europskih zemalja, osobito austrijskih, odnosno njemačkih zemalja. Najstariji među njima iskovan je 1538. god., a najmlađi, kako je već

naveo Šime Ljubić, 1567. god., te bi se, budući da je blago dijelom raspršeno, ta godina morala uzeti kao *terminus post quem* za njegovo zakapanje.

SUMMARY

COIN HOARDS FROM CROATIA

XIV. HOARD OF 16TH C. GOLD AND SILVER COINS FROM SVINJAREVCI

The Slavonian village of Svinjarevci (Orolik, Vinkovci, Croatia) was described some time (1857) before the discovery of the treasure by Vinko Sabljar, the brother of the Croatian National Museum curator and director Major Mijat Sabljar, as a place with 95 houses, 500 inhabitants, of which 50 were Germans, 115 Hungarians and 5 belonged to other nationalities; 495 were Roman Catholics and 5 Jews. (SABLJAR 1866: 411). The situation in 1895 was as follows: the village had a primary school, there were 148 houses, 760 inhabitants, the Roman Catholic parish was at Stari Jankovci, the Greek-Oriental parish was at Negoslavci, it covered a surface of 2,219 acres and 1,270 fathoms. The administration was at Negoslavci, which belonged to the district of Vukovar, in the County of Srijem (*Razdieljenje* 1895: 200). Korenčić lists the number of inhabitants: 500 in 1857, 610 in 1869, 691 in 1880 (one year before the treasure trove), 760 in 1890, 726 in 1900, 771 in 1910, 760 in 1921, 810 in 1931, 851 in 1948, 838 in 1953, 917 in 1961 and finally 956 in 1971 (KORENČIĆ 1979: 746).

As an archaeological site Svinjarevci became known through the excavations of an early Croatian cemetery undertaken by the amateur Karl Franz Nuber of Osijek in the last decade of the 19th c. In some of the graves there were Hungarian silver coins struck under the Arpadian kings Béla I. (1048–1063) i Ladislaus I. (1077–1095) (BRUNŠMID 1904 : 87–90; MIRNIK 2002: 110, 113; 2004: 217).

The discovery of the coin hoard was described by Šime Ljubić in the same year 1881. It was found by Luka Parmanac, a shepherd on June 29, 1881, on a site called the »Wallachian Graveyard«, close to the road leading from Svinjarevci to Orolik, approximately one kilometer from Svinjarevci. The plot was owned by Josip Rikard. Parmanac suddenly saw some small silver coins lying on the ploughed land, took a few and showed them to another shepherd called

Ivan Petkov. A third shepherd, Grgo Ambruš joined them, and following Petkov's suggestion, they took a hoe and returned to the site, where they started digging. Not more than one and half foot deep, there was a pot, full of gold and silver coins. According to what Luka Parmanac said, Luka and Grgo divided the treasure, thus each one took 51 talers and 52 ducats. The right reverend Sebastijan Riesel, parish priest at Stari Jankovci, as soon as he heard of this, informed the district prefect in Vukovar. The latter dispatched one of his secretaries M. Nikolajević to the village of Svinjarevci in order to get hold of the treasure. Unfortunately the coins taken by Parmanac had already been dispersed, and Grgo buried most of his part, fearing that it might get lost. Therefore Nikolajević managed to collect only 48 gold ducats, 55 silver talers, 4 silver forints and 50 specimens of small change. No further enquiry was undertaken. Most of the saved coins reached the Croatian National Museum Archaeological Department in Zagreb.

Among the Turkish money there are some gold and silver coins, struck by Bayazid I (one coin, the oldest one in this preserved part of the hoard), Selim I (three coins) and Suleymān II the Magnificent (54 specimens) in several mints. Gold sequins are very well struck, but the small akche are very superficially struck, worn, pierced or even corroded. The remainder of the hoard are talers and half talers of various central European states, particularly Austrian and German. The oldest was struck in 1538 and the most recent in 1567, therefore this year ought to be taken as the *terminus post quem* for the burial of this treasure.
