SOCIAL DRESS
The term "social dress" designates clothes that have a connecting function. The Socialdress workshops disseminate knowledge on making clothes and raise awareness of the impact globalization is having on local textile industries and the artisan skills that are dying out. Witty, functional, and simple clothes are made at the workshops. An important part of the workshops is sharing stories and experiences. In this way we create and spread the Socialdress trademark. Socialdress clothes cannot be bought in stores, they can only be made.
