Contemporary society is characterized by changes that are reflected in all areas of life - economic, cultural and educational. Future citizens of the world are expected to adapt to such a world. In educational terms, this can be interpreted as children's adaptation to kindergartens and schools. (...) The approach in which a child adjusts to the education system deviates from the demands of modern pedagogy. Early and preschool education is part of a system that does not expect the child to adapt to it, but it is adapted to the child through cooperation of both in-service teachers and scientists. (...) The importance of early and preschool education is indisputable, and a contribution to such an understanding is the result of bringing together theory and practice¹.

This edition is a Book of Proceedings of the Scientific and Professional Conference "Growing up Together: Redefining the Practice and Theory of Preschool Education" which was held in Čakovec on April 12 and 13, 2018. More than 100 in-service teachers and scientists presented in their scientific and professional papers examples of good teaching practice and theory in early and preschool education.

Suvremeno društvo obilježeno je promjenama koje se reflektiraju u svim područjima života –ekonomskom, kulturnom i obrazovnom. Od budućih građana svijeta očekuje se prilagodljivost na svijet. U obrazovnom smislu to se može protumačiti prilagodbom djece na vrtiće i škole. (...) Pristup u kojem se dijete prilagođava obrazovnom sustavu odstupa od zahtjeva suvremene pedagogije. Rani i predškolski odgoj i obrazovanje dio je sustava koji ne očekuje da se dijete prilagodi njemu, već se zajedničkim djelovanjem praktičara i znanstvenika prilagođava djetetu. (...) Važnost ranoga i predškolskoga odgoja i obrazovanja neosporna je, a doprinos takvom shvaćanju rezultat je zajedništva teorije i prakse.²

Ovo je izdanje Zbornik radova predstavljenih na znanstveno-stručnom skupu „Zajedno rastemo – Redefiniranje prakse i teorije ranoga i predškolskoga odgoja” 12. i 13. travnja 2018. u Čakovcu. Više od 100 praktičara i znanstvenika svojim je znanstvenim i stručnim radovima predstavilo primjere dobre prakse i teorije ranoga i predškolskoga odgoja i obrazovanja.
