

CROATICA  
CHEMICA ACTA

Croat. Chem. Acta 40 (1968) No. 3

Zagreb, Jugoslavija

25.10.1968.

## SADRŽAJ

## Originalni znanstveni radovi

- K. Adamić:** Molekularno gibanje u škrobu na osnovu protonske magnetske relaksacije (spin-rešetka) . . . . . 111
- N. Pavković, M. Branica i B. Težak:** Taloženje i topljivost uranil ortofosfata.  
I. Heterogena ravnoteža u otopinama:  $UO_2(NO_3)_2 - H_3PO_4$  . . . . . 117
- N. Pavković, M. Wrischer i M. Branica:** Taloženje i topljivost uranil ortofosfata.  
II. Heterogena ravnoteža u otopinama:  $UO_2(NO_3)_2 - H_3PO_4 - NHO_3$  . . . . . 127
- I. Filipović, I. Piljac, A. Medved, S. Savić, A. Bujak, B. Bach-Dragutinović i B. Mayer:** O polarografskom određivanju konstanta stabilnosti formijato, acetato, propionato, butirato i laktato kompleksa kupruma, cinka, kadmiuma i plumbuma . . . . . 131
- A. Nikolovski:** Sintaza na nekom dioksovolfram(VI) helati so 1,3-diketoni . . . . . 143
- B. Matković, B. Prodić, M. Šljukić i S. W. Peterson:** Kristalna struktura kalij ditorij trisfosfata . . . . . 147
- N. Trinajstić i A. Hinchliffe:** Račun molekularnih orbitala za neke bitiofene i bifurane . . . . . 163
- I. Pečevsky i Ž. Kučan:** Vjerojatna uloga poznatih enzima u razgradnji RNA kod bakterija *Escherichia coli* . . . . . 171
- A. Krbavčić, B. Stanovnik in M. Tišler:** Sintaza piridazinovih derivatov. XXIII. Sintaza izomernih azolopirido(3,2-*d*)- in azolopirido (2,3-*d*)piridazinov . . . . . 181
- D. S. Petrova i H. P. Penner:** Redukcija na nekoj 2-tiazolin benzamidni i karbamatni derivati so pomoš na litium aluminium hidrid . . . . . 189

## Bilješke

- M. Maksimović, B. Bošković i Z. Binenfeld:** *In vitro* i *in vivo* reaktivacija kolonesteraza inhibiranih najtoksičnijim organofosfornim spojevima. Aktivnost 1,3-aceton-bis-(4-hidroksiiminoformilpiridinijum) dibromida u usporedbi s aktivnošću 1,3-trimetilen-bis-(4-hidroksiiminoformilpiridinijum) dibromida i 1,3-dimetileter-bis-(4-hidroksiiminoformilpiridinijum) dibromida . . . . . 195
- B. D. Podolešov:** Oksidacija na 10-acilfenotiazinski derivati so oloven tetraacetat . . . . . 201

## Prilozi

- Recenzije . . . . . A31
- Hrvatsko kemijsko društvo — Podružnica Rijeka . . . . . A37

## CONTENTS

## Original Scientific Papers

<b>K. Adamić:</b> Molecular Motion in Starch by Proton Spin-Lattice Relaxation . . .	111
<b>N. Pavković, M. Branica, and B. Težak:</b> Precipitation and Solubility of Uranyl Orthophosphates. I. Heterogeneous Equilibria in Solutions of: $\text{UO}_2(\text{NO}_3)_2 - \text{H}_3\text{PO}_4$ . . .	117
<b>N. Pavković, M. Wrischer, and M. Branica:</b> Precipitation and Solubility of Uranyl Orthophosphates. II. Heterogeneous Equilibria in Solutions of: $\text{UO}_2(\text{NO}_3)_2 - \text{H}_3\text{PO}_4 - \text{HNO}_3$ . . .	127
<b>I. Filipović, I. Piljac, A. Medved, S. Savić, A. Bujak, B. Bach-Dragutinović, and B. Mayer:</b> On the Polarographic Determination of Stability Constants of Formate, Acetate, Propionate, Butyrate, and Lactate Complexes of Copper, Zinc, Cadmium, and Lead . . .	131
<b>A. Nikolovski:</b> Synthesis of Some Dioxotungsten(VI) Chelates with 1,3-Diketones	143
<b>B. Matković, B. Prodić, M. Šljukić, and S. W. Peterson:</b> The Crystal Structure of Potassium Dithorium Trisphosphate, $\text{KTh}_2(\text{PO}_4)_3$ . . .	147
<b>N. Trinajstić and A. Hinchliffe:</b> Molecular Orbital Calculations for Some Bithiophenes and Bifurans . . .	163
<b>I. Pečevsky and Ž. Kučan:</b> The Possible Roles of Known Enzymes in the Break-down of RNA in X-Irradiated <i>Escherichia coli</i> . . .	171
<b>A. Krbavčić, B. Stanovnik, and M. Tišler:</b> Synthesis of Pyridazine Derivatives. XXIII. Synthesis of Isomeric Azolopyrido(3,2-d)- and Azolopyrido(2,3-d)-pyridazines . . .	181
<b>D. S. Petrova and H. P. Penner:</b> Reduction of Some 2-Thiazoline Benzamide and Carbamate Derivatives with Lithium Aluminum Hydride . . .	189

## Notes

<b>M. Maksimović, B. Bošković, and Z. Binenfeld:</b> <i>In vitro</i> and <i>in vivo</i> Reactivation of Cholinesterases Inhibited by Highly Toxic Organophosphorus Compounds. A Comparison Between 1,3-Acetone-bis-(4-hydroxyiminoformyl pyridinium) dibromide, 1,3-Trimethylene-bis-(4-hydroxyiminoformyl pyridinium) dibromide, and 1,3-Dimethylether-bis-(4-hydroxy-iminoformyl pyridinium) dibromide . . .	195
<b>B. D. Podolešov:</b> The Oxidation of 10-Acylphenothiazines with Lead Tetraacetate	201
