New Model 139 Ultraviolet - Visible

Spectrophotometer — by any standard
gives more performance at less cost

At no extra cost:

- Full coverage of ultraviolet and visible range
- Transistorized line-operated power supply
- High dispersion diffracting grating optics
- Direct reading in transmittance and absorbance
- Linear wavelength output
- Normal operating range is 195—800 m μ
- Single wide-range phototube for entire operating range
- **Optional:** All attachments for ultraviolet and visible spectral analysis, plus such exclusive attachment as atomic absorption and emission photometry.
- **Price** of the basic equipment: US-\$ 1,850 fob Tokyo
- **Please write** for a complete brochure
