

INTRODUCTION

Dear readers,

we are proud to present the new issue of the international journal Education for Entrepreneurship. This edition includes selected articles from the 8th International Conference on Entrepreneurial Learning (ICEL 8), whose main theme was Sustainable Entrepreneurship: Business Success Through the Interaction of an Economic, Social, Ecological and Cultural System as well as other articles that cover the fields of economics, entrepreneurship, management, and education for entrepreneurship.

This journal issue is intended for all those who have a strong inclination to perceive economics as a science and as a profession, and especially those who deal with or want to engage in sustainable entrepreneurship. The journal gives a special contribution to the academic and professional community by increasing the total theoretical and empirical knowledge in all areas covered by the journal.

The focus of the journal is on social sciences - in the fields of economics, entrepreneurship, and management, as well as in education and learning for entrepreneurship. Given that the goal of this journal is a contribution to the development of empirical, methodological, theoretical, and practical knowledge in these areas, this issue publishes works on the development of entrepreneurial competencies, the connection of entrepreneurship and economy, and company management with specific types of entrepreneurship.

In the end, we want to thank the authors, the members of the editorial board, the reviewers, and all other parties involved in the realization of this issue of the journal. We hope that you recognize the effort and work which have been invested and we invite you all to give your scientific and professional contribution as authors to future releases of the Education for Entrepreneurship journal.
