Sustainable Turning of Martensitic Stainless Steel Goran Cukor, Graciela Šterpin-Valić, Tihana Kostadin, Marko Fabić	1
Wind Characteristics in the Wake of a Non-Rotating Wind Turbine close to a Hill Hrvoje Kozmar, Davide Allori, Gianni Bartoli, Claudio Borri	13
Experimental Study on the Effect of Excitation Type on the Output-Only Modal Analysis Results Sina Varahram, Peyman Jalali, Morteza H. Sadeghi, Saeed Lotfan	37
Design and Mechanics Analysis of the Deep Cavity Tapered Roller Thrust Bearing Used in a Positive Displacement Motor Jie Zhang, Yang Liu, Han Zhang	53
Sacrificial Support Fixture Optimisation for the CNC Rapid Machining of Medical Parts with Thin Ends Ashwini M.Ramteke, Kishor M. Ashtankar	65
Experimental Investigation, ANN Modelling and TOPSIS Optimization of a Gasoline Premixed HCCI-DI Engine with Direct Injection of FeCl₃ Nanodditive Blended WCO Lionus Leo G.M., Sekar Subramani, Arivazhagan Sundaraganesan	83
Professional papers	
Regenerative Hydraulic Shock Absorber: A Novel Prototype Design Solution and a Methodology for the Calculation of Dynamic Strength Vjekoslav Tvrdić, Srdjan Podrug, Damir Jelaska, Milan Perkušić	101
Experimental Investigation Into Fatigue Behaviour of EN- 8 Steel (080M40/AISI 1040) Subjected to Heat Treatment and Shot Peening Processes Chinnadurai Prabhu, Murugesan Jayaraman, Mani Rajnikanth	125
In Memoriam Professor Dušan Jeras
