

## Subject Index: CIT Vol. 27 (2019), N° 1–4

---

- artificial neural network, (4) 1–16
- BDI, (1) 13–24
- biomarkers, (3) 57–71
- business process, (1) 59–75
- cancer genes, (3) 57–71
- CIDDS, (4) 1–16
- classification, (3) 15–28
- Coalition formation, (1) 1–12
- correlation coefficient, (2) 41–54
- cryptography, (4) 47–63
- CUDA, (2) 55–66
- deep learning, (2) 41–54
- defeasible logic, (1) 43–57
- digital signature, (2) 29–39
- dimensionality reduction, (4) 1–16
- disjoint paths, (3) 1–14
- distributed software technology, (1) 25–42
- distributed systems, (3) 1–14
- dynamic programming, (2) 55–66
- educational experience, (1) 25–42
- experiments, (1) 43–57
- fault tolerance, (3) 1–14
- fluid simulation, (4) 31–46
- Formal modeling, (2) 1–16
- fuzzy logic, (3) 45–56
- GPU, (2) 55–66
- Hbase, (4) 17–30
- human-agent collaboration, (1) 13–24
- hybrid reasoning, (1) 43–57
- incident management, (3) 45–56
- integrity, (4) 47–63
- intrusion, (2) 29–39
- intrusion detection, (4) 1–16
- IT operation, (3) 45–56
- knowledge repository, (2) 29–39
- labelled logic, (1) 43–57
- Lean IT, (3) 45–56
- link-state, (2) 17–27
- load balancing, (2) 17–27
- logistics system, (1) 59–75
- LTL, (2) 1–16
- manufacturing strategies, (1) 59–75
- mathematical modelling, (1) 59–75
- message authentication, (4) 47–63
- multiagent middleware, (1) 25–42
- multiagent systems, (1) 13–24
- multi-path routing, (2) 17–27
- network, (2) 29–39
- network routing, (3) 1–14
- nonlinear principal component analysis, (4) 1–16
- NPDP, (2) 55–66
- NSL-KDD, (4) 1–16
- oil spill, (4) 31–46
- optimisation, (1) 59–75
- Organization, (1) 1–12
- parallel computing, (2) 55–66
- phishing, (2) 41–54
- piecewise linear representation, (3) 15–28
- Poisson disk algorithm, (4) 31–46
- PPIN, (3) 57–71
- principal component analysis, (4) 1–16
- Promela generation, (2) 1–16
- Pursuit-evasion games, (1) 1–12
- Q-learning, (1) 1–12
- query, (4) 17–30
- random walk algorithm, (3) 57–71
- routing metric, (2) 17–27
- security, (2) 29–39
- security, (3) 1–14
- shapelet, (3) 15–28
- simulation, (1) 59–75
- SPIN, (2) 1–16
- Spindle engine, (1) 43–57
- SSmart Grid, (2) 1–16
- storage, (4) 17–30
- survival analysis, (3) 57–71
- temporal logic, (1) 43–57
- temporal RDF, (4) 17–30
- tests, (1) 43–57
- uncertain time series, (3) 15–28
- Unity3D, (4) 31–46
- V&V, (2) 1–16
- waste management, (3) 45–56
- wireless mesh network, (2) 17–27
