Corrigendum

In my paper, *Miličević A. The relationship between antioxidant activity, first electrochemical oxidation potential, and spin population of flavonoid radicals. Arh Hig Rada Toksikol 2019;70:134–9 (DOI: 10.2478/aiht-2019-70-3290)*, I have discovered a typing error in equation 2 on page 136. The “AA_i” in the divisor row should be replaced by “AA_{min}” to read as follows:

$$\text{relative AA} = \frac{AA_i - AA_{\min}}{AA_{\max} - AA_{\min}}$$

This typing error has in no way affected the calculations and results in the study. I apologise for any inconvenience it may have caused to readers and the publisher.

Ante Miličević

Editor's note on the corrigendum

Considering that the error was only in typing and only in one place, we have replaced the online article with the corrected version on our Sciendo platform and HRČAK repository and invite the readers of the print issue to retrieve the updated article there.
