**The Kinetics of the Formation of Aluminium Hydroxide
by Seeding Sodium Aluminate Solution with Hydrargillite
Crystals. IV. On the »Contact-intercrystallization«**

**(Kinetika stvaranja aluminijsva hidroksida cijepljenjem otopine natrijsva aluminata
kristalima hidrargilita. IV. O »kontaktnoj interkristalizaciji«)**

P. Bogdanović, S. Maričić and M. Vidan

[*Croatica Chemica Acta* 28 (1956) 155—162]

Received July 30, 1957

By comparison of the dehydration curves, we ascribed erroneously the hydrargillite-crystal-structure to the seed II. Later, an x-ray check showed clearly the crystal structure of the seed II is that of bayerite, and not of hydrargillite.

Usporedivši krivulje dehidratacija pripisali smo pogrešno cjepivu II kristalnu strukturu hidrargilita. Kasnije je kontrolni rentgenogram pokazao jasno strukturu bajerita.
