

## **SUMMARY**

### **FAUNA OF HORSE FLIES (DIPTERA: TABANIDAE) IN THE SURROUNDINGS OF OSIJEK**

*Some very extensive faunistically - ecological research works have been carried out on 4 stations in the surrounding area of Osijek during 1992, 1993, 1994 and 1995. All together 4452 horse flies were collected, and established 26 species of horse flies for this area. Eight species *Haematopota subcylindrica*, *Tabanus bromius*, *Haematopota pluvialis*, *Chrysops parallelogrammus*, *Hybomitra ciureai*, *Tabanus autumnalis*, *Tabanus maculicornis* and *Tabanus tergestinus* make up 92,6% of horse fly fauna on the investigated area.*
