DISCUSS ON THE IMPROVEMENT OF COLLEGE ENGLISH TEACHING QUALITY FROM THE PERSPECTIVE OF PSYCHOLOGICAL EFFECT

Meichun Yang

Guangdong Mechanical & Electrical Polytechnic, Guangzhou, Guangdong, 510000, China

Different psychological effects in life have different emotional effects on people. It is the behavior or function of a certain person or thing. Because the role of psychological effect affects people's different behaviors, there are many corresponding changes. Based on the study of psychology and pedagogy, teachers can understand and master some common psychological effects and make good use of them in English classroom teaching, which can often achieve twice the result with half the effort. Teachers should create an equal and democratic classroom teaching environment and make full use of motivation strategies to alleviate students' anxiety and stimulate students' internal learning motivation, so as to improve the quality of classroom teaching. There are various teaching methods in English classroom. Teachers should strive to explore in teaching practice to make English teaching more in line with the laws of language teaching, psychology and pedagogy. Only in this way can we improve efficiency, reduce students' burden and comprehensively improve students' quality. To improve students' classroom learning efficiency, this paper mainly discusses the role of psychological effect in improving the English education.

Keywords: psychological effect - english education - students' psychological quality

CRIMINAL PSYCHOLOGICAL ANALYSIS OF THE CRIME OF PERSECUTION IN INTERNATIONAL LAW

Yuyuan Yang

Macau University of Science And Technology School of International Law, Macau, China

Crime as a social phenomenon is a historical category. The criminal psychology of the perpetrator is the internal factor of individual criminal behavior. Criminal psychology analyzes the criminal psychology of criminals with the analysis method of psychology, and summarizes the psychological motivation, psychological process and psychological law of crime. It provides scientific analysis basis and solutions for crime prevention, punishment and correction. The crime of persecution is a specific crime among crimes against humanity. It entered the field of international law after World War II. Since then, after more than half a century of evolution, the crime of persecution has become more and more mature in terms of definition and constitution. The objective element of the crime of persecution is that the perpetrator seriously deprives a group or collective (one or more persons) of their basic rights in violation of the provisions of international law. The subjective element is intentional and requires the perpetrator to have discriminatory intention. Based on the analysis of the criminal psychology of the crime of persecution in international law, this paper discusses the research and application of the criminal psychology of the crime of persecution from the perspective of crime prevention, crime trial and crime correction.

Key words: international law - crime of persecution - criminal psychology

Big data has been widely used in various disciplines, and its role in promoting health research has become increasingly significant. At the same time, psychologists at home and abroad are gradually exploring the use of big data to overcome the problems of traditional small samples and measuring time difference for psychological research. There is no dispute about the psychological benefits of big data. The era of big data is the era of the emergence and development of big data and cloud computing, which is gradually affecting the modern risk oriented audit model. The era of big data not only helps to identify the risk of material misstatement and promote the development of real-time audit, but also affects the form of audit evidence and provides a new modern audit method for modern risk-oriented audit. In recent years, ICT has made continuous breakthroughs under the background of the national big data strategy, promoted the rapid integration of big data technology and the psychological industry, and improved the efficiency of social resource allocation. Big data technology plays an important role in big data acquisition and analysis. There has been relevant research on risk oriented data audit of big data, but there is still a gap in the risk oriented data audit model of big data combined with psychological problems. Therefore, this paper explores the risk oriented data audit model based on psychological problem big data.

Key words: psychological problems - big data - risk oriented data - audit mode

ANXIETY OF CULTURAL INDUSTRY PRACTITIONERS IN THE STAGE OF SOCIAL DEVELOPMENT

Xuexin Zhou

School of History and Culture, Hubei University, Wuhan, Hubei, 430000, China

The development of society is bound to bring changes to the industry, which will also bring new employment situations and difficulties to practitioners. Cultural industry is an open complex. Every move in the development of social change will affect or even change its process. The turn of social space and cultural change reflect each other, which increases the possibility of entering a new stage of development and a new vision. A survey shows that at this stage of social development, more than 90% of workers have varying degrees of career anxiety. Anxiety is very common in people's life, and it is also one of the symbols of the development of modern society. Anxiety is bred by social and economic development, and has a significant impact on people's daily life. As a common psychological obstacle of cultural industry practitioners, the negative impact of anxiety on work is common, and it is also an important factor perplexing the development of cultural industry. This paper will vertically explore the anxiety brought by the change in social development to the practitioners of cultural industry from the perspective of time and find ways to adapt.

Key words: social development - cultural industry - practitioners - anxiety phenomenon
