

# A CONTRIBUTION TO THE RESEARCH OF ARCHITECTURAL OPUS MIRO SAFNER (1928-2007)

## SUMMARY

Based on the available data, the paper presents for the first time the architectural work of architect Miro Safner, born in Osijek. Since Miro Safner graduated in 1955, his architectural work refers to the period after the Second World War in Croatia, then the former Yugoslavia and the Czech Republic, Austria, Germany and Cuba. The research is lacking in many places because in the procedures of privatization of architectural bureaus, construction, and industrial companies after 1991, numerous project

documentation was lost. His industrial-food architecture projects reflect knowledge of production and technological processes, large-scale constructions and functions. Residential and leisure building projects are characterized by functionalism and simple design.

**Keywords:** Miro Safner, industrial-food architecture, Osijek, Gospić, TEB, Prehrambeno-tehnološki institut.
