NOVAC ISTOČNOG RIMSKOG CARSTVA
U NUMIZMATIČKOJ ZBIRCI ARHEOLOŠKOGA MUZEJA U ZAGREBU

UDK 717.111 (495.02)
Izvorni znanstveni rad

Auktor daje opis 411 primjeraka zlatnog, srebrnog i brončanog novca, iskovanog u ime careva Istočnog Rimskog Carstva od Arkadija (395-408. g. po Kr.) do Zenona (474-491. g. po Kr.) u kovnicama kako Zapadnog, tako i Istočnog carstva. Opisani primjerci čuvaju se u numizmatičkoj zbirci Arheološkog muzeja u Zagrebu i gotovo svi su nalazi s domaćeg tla, odnosno s područja Panonije. Novac je obrađen pomoću računalnog programa NUMIZ (Numizmatični kabinet, Narodni muzej, Ljubljana).

Istočnorimski novac u sustavnoj zbirci Arheološkoga muzeja u Zagrebu nije osobito brojan. Spomenimo i to daje skoro sva zbirka sabrana u prošlosti, do I. svjetskog rata, što govori o kasnijem položaju numizmatičke zbirke i odnosu prema samome muzeju. Brončani su primjerci najčešće slabije sačuvani, budući da potječu s raznih nalazišta, a ne s numizmatičkog tržišta.

Pedesetih i šezdesetih godina 19.st, dok je numizmatičku zbirku još sređivao cesarski i kraljevski major u miru Mijat Sabljar, istočnorimskog i bizantskog novca bilo je doista malo. Sačuvani nam inventarski arci u kartonskom fasciklu označenom kao "Sirmium/ Viminacium/ Aquileja/ i dr. rimski" (Arhiv br.10) sadrže samo zlatni *tremissis* Arkadija, dar gorljivog Ilirca Stjepana Mlinarića, tada još kapelana, 1846. god. (sadašnji inv.br.8), tri zlatnika Leona I. - darove Baltazara Čalegovića, načelnika grada Osijeka 1851. god. (br.266), Ivana pl.Kukuljevića Sakcinskog (br.268) i Stjepana Mlinarića po Dragutinu Rakovcu 1846. god. (br.267) - te dva tremisa Zenona, jedan nađen u Bruvnu, na području I. Banske regimente, dar Josipa Torbice, trgovca u Glini (br.285), te drugi, poklon Ivana Kargačina iz Novog Vinodolskog 1846. god. (br.283). Brončanog novca tada u zbirci ili još nije bilo, ili nam arci nisu sačuvani, a možda nisu još ni bili inventirani. Don Šime Ljubić, kako se čini, nije stigao inventirati mnogo toga iz numizmatičke zbirke, primjerice bizantski, dok je Josip Brunšmid u inventar bizantskog novca vlastoručno unio 1279 primjeraka novca.

Do sada je u spomenutu inventarsku knjigu bizantskog novca uvršteno 410 primjeraka novca iskovanog u ime istočnih careva, od podjele Carstva na Istočno i Zapadno za vladanja Teodozija I (19.1.379 - 17.1.395). Tako je tu uključen novac svih u sustavnoj zbirci zastupljenih vladara od Arkadija (17.1.395 - 1.V.408), od vremena kad gaje njegov otac proglasio Augustom 383. god., do

Zenona (prvo vladanje: X1.474 - 9.1.475 g.; drugo vladanje: VIII. 475 - 9.IV.491), pa čak i osobito rijedak kov uzurpatora Leoncija (19.VII.484 - 488), nepoznate provenijencije (kat.br.388). Zapadno je Rimskog Carstvo propalo smrću posljednjeg njegovog cara Romula Augustula (31.X.475 - VIII/IX.476), a novac njegovih vladara inventiran je u inventarske knjige rimskog carskog novca.

Sav ostali novac iskovan poslije nastupa prijestolja mudrog Anastazija (11.IV.491-1.VII.518), već se dugo vremena smatra pravim bizantskim novcem. Veliki numizmatički pisci u 18.st., kao što su to bili znameniti Dubrovčanin Anselmo Bandur (*BANDURIUS* 1718: 525-607) i Austrijanac Joseph Eckhel (*ECKHEL* 1798: 168-205) nisu još dijelili novac obaju carstava, nego su ih obrađivali zajedno, kronološkim slijedom. S druge strane tijekom 19. st. i dijelom 20. st. uvedena je u numizmatičkoj disciplini vrlo stroga formalna podjela na Istočno i Zapadno Carstvo, te se je strogo pridržavaju eminentni auktori, primjerice Jean Sabatier (*SABATIER I.*, 1862) i grof Ivan Tolstoj (*TOLSTOJ* 1912: 1-169). Goodacre u prvom dijelu svog priručnika, koji je prvi put objavljen 1928. god., također općenito govori o novcu careva od Arkadija do Leoncija (*GOODACRE* 1964: 21-57).

Gotovo istovremeno britanska bizantološka numizmatička znanost, na čelu koju je tada bio Warwick Wroth, kreće mnogo logičnijim putem. Tako se u vrijednim katalogima *The Roman Imperial Coinage* - koje su od 1923. god. uređivali vrsni stručnjaci Odjela za novac i medalje Britanskog muzeja u Londonu Harold Mattingly, C.H.V.Sydenham, Percy H.Webb, C.H.V.Sutherland, a kasnije Robert A.G. Carson, John P.C.Kent i Andrew Burnett - carski kovovi prvo redaju geografski, po kovnicama, prema već davno ustanovljenom redoslijedu od zapada prema istoku, u smjeru kretanja kazaljki na satu, a tek u okviru toga se poštivaju kronološki kriteriji.

Vrijeme koje nas u konkretno sada zanima pokrivaju dva sveska RIC: dijelom deveti (Valentinianus I - Theodosius I), prvi put obavljen 1933. god. (RIC IX = *PEARCE* 1968), s prvim Arkadijevim kovovima, te tako dugo čekani monumentalni deseti svezak koji pokriva kovove vladara od podjele Carstva do pada Zapadnog Carstva (RIC VIII = *KENT* 1994). Do tiskanja RIC X numizmatičari su se služili praktičnim i preglednim priručnikom *Late Roman Bronze Coinage* (*CARSON - KENT* 1978), izvorno objavljivanim numizmatičkom časopisu *The Numismatic Circular* od 1956. do 1959. god. Pokriva vrijeme od pobjede Konstanina Velikog nad Licinijem Starijim i Mlađim 324. god., do velike novčane reforme cara Anastazija 498. god. Ponukan nedostatkom prikladne literature za kovove Istočnog Rimskog Carstva između 408. i 491. g. po Kr., *JVolkang Hahn*, poznati stručnjak iz Beča objavio je u nizu *Moneta Imperii romani/Moneta Imperii Byzantini* jednu vrlo preglednu "rekonstrukciju sustava kovanja na sinoptičkoj tabelarnoj osnovi" s odličnim komentarima, 15 tabli i pet preglednih tablica (*HAHN* 1989). Budući daje veći dio nominala toga vremena bio vrlo sitan, to Hahn daje i njihova povećanja. Obradeni novac potječe iz mnogih zbirki diljem svijeta.

Velika važnost pridaje se i nedavno objavljenom reprezentativnim katalogu velike zbirke bizantološkog centra Dumbarton Oaks (Washington D.C., Sjedinjene Američke Države) pisaca P.Griersona i M.May (*GRIERSON - MAY* 1992). Ta zbirka broji 955 primjeraka obaju carstava iskovanih od Honorija i Arkadija do nastupa prijestolja cara Anastazija. Svi primjerci potječu ili s numizmatičkog tržišta, ili iz nekih privatnih zbirki. Ovaj se svezak može smatrati uvodnim u niz kataloga bizantskog novca čuvanog u Dumbarton Oaks.

Za razliku od navedenoga kataloga, gotovo sve primjerke novca iz povijesnog razdoblja o kojemu je riječ, a koji se čuvaju u Zagrebačkoj zbirci možemo, uz nekoliko iznimki, smatrati lokalnim nalazima, premda mjesta nalaza nisu u svakom pojedinom slučaju zapisana, te nam oni zorno ocrtavaju predodžbu o optičaju novca u provinciji Panoniji u tim odlučujućim stoljećima nestanka carske vlasti i propadanju urbanih struktura. Ova bi slika bila mnogo cjelovitija upotpu-

njena novcem istovremenih zapadnih careva iskovanih u obje polovice razdijeljenoga carstva. Osim zastupljenoga novca pojedinih careva, koji se još od brojnog novca Arkadija i Teodozija II naglo smanjuje kod njihovih nasljednika, važno je proučiti i zastupljenost kovnica novca, kako onih u Istočnom, tako onih u Zapadnom Carstvu.

Za primjerke novca sa zapisanim nalazištem auktor se je služio novijim Akademijinim imenikom za Hrvatsku (KORENČIĆ 1979), a za nalaze iz još neokrnjene Srijemske županije, kakva se nalazila u djelokrugu Muzeja, Imenikom iz 1895. god. (*Političko i sudbeno radieljenje*, 1895). Svojim su savjetima i pomoći u sastavljanju kataloga uzeli učešća kolege Željko Demo, Zdenka Dukat, Peter Kos i Andrej Šemrov, te im najljepše zahvaljujem.

Redanje u katalogu četverostruko je: prvo je naveden tekući broj kataloga *Roman Imperial Coinage* (RIC, svesci IX i X), zatim, za brončane kovove broj *Late Roman Bronze Coinage* (LRBC), a na trećem se mjestu nalazi redni broj popisa Tolstojeve zbirke (Tol.), kako gaje odredio Brunšmid. Često je pojedini primjerak identificiran prema katalogu zbirke Dumbarton Oaks (DOC). Datacije su uzete iz djela *Roman Imperial Coinage*.

Kovnice zastupljene u Zagrebačkoj zbirci su slijedeće:

Mediolanum	Kat.br.	1-5 (5 primjerka)
Ravenna	6-8	(3)
Roma	9-11	(3)
Aquileia	12-35	(24)
Siscia	36-105	(70)
Salona	106	(1)
Sirmium	107-108	(2)
Thessalonica	109-136	(27)
Heraclea	137-152	(16)
Constantinopolis	153-259	(107)
Nicomedia	260-295	(36)
Cyzicus	296-373	(78)
Antiochia	374-385	(15)
Alexandria	389-393	(5)
Neodrediva kovnica	391-406	(13)
Nepoznata kovnica	407-411	(5)

SUMMARY

COINS OF THE EAST ROMAN EMPIRE IN THE NUMISMATIC COLLECTION OF THE ARCHAEOLOGICAL MUSEUM IN ZAGREB

The author describes 411 gold, silver and bronze coins minted in the name of Emperors of the East Roman Empire from Arcadius (A.D. 395-408) to Ženo (A.D. 476-491) from the mints of both Western and Eastern parts of the Empire. The coins described are part of the numismatic collection of the Zagreb Archeological Museum, almost all found in Croatian Pannonia. The coins have been classified according to the NUMIZ programme (Numismatic Cabinet of the Ljubljana National Museum, Slovenia).

The museum does not have a large number of coins from the Eastern Empire. Most of the specimens have been acquired a long time ago, chiefly before the First World War. Bronze denominations are frequently worn or badly preserved because they came from various sites and not from the market. In the fifties and sixties of the 19th century, when the numismatic collection was being classified by I.R. Major Mijat Sabljar there were very few indeed. The inventory forms of the time contain the entry "Sirmium/ Viminacium/ Aquileja and other Roman" (archive, no 10) and consisted of one gold Arcadius tremissis, gift of Stjepan Mlinarić, then still a chaplain, 1846 (now inv. no. 8), three gold Leo I coins, gift of Balthazar Čalegović, Mayor of Osijek 1851 (no. 266), Ivan Kukuljević de Sacci (no. 268) and Stjepan Mlinarić through Dragutin Rakovec 1846 (no. 267), two Ženo tremisses, one found in Bruvno on the former territory of the I Banal Regiment, gift of Josip Torbica, a Glina merchant (no. 285) the other from Ivan Kargačin from Novi Vinodol 1846 (no. 283). There were then either no bronze coins in the collection or if there were the record is lost. Don Šime Ljubić it seems did not manage to inventory a considerable amount of the numismatic collection, and the Byzantine not at all, while Josip Brunšmid recorded in his own hand 1,279 Eastern Roman and Byzantine coins.

At present the inventory of Byzantine coins records 411 coins bearing the names of eastern emperors, from the division of the Empire into East and West until the reign of Theodosius I (19.1.379 - 17.1.395). It thus contains coins from Arcadius (17.1.395 - 1.V.408) at the time his father proclaimed him Augustus in A.D. 383 to Ženo (first reign XI.474 - 9.1.475; and second reign VIII.475 - 9.IV.491) even including a very rare bronze issue of the usurper Leontius (19.VII.484 - 488). The West Roman Empire collapsed with the death of the last emperor Romulus Augustulus (31.X.475 - VIII/IX.476) and its coins are in a separate Roman Empire inventory. All other coins minted after the wise Anastasius came to the throne (11.IV.491 - 1.VII.518) have long and rightly been considered Byzantine.

It may be considered that almost all the coins we are now considering and which are part of the Zagreb collection are local finds, although the place they were discovered is not in all cases recorded. They provide an excellent picture of the circulation of money in the province of Pannonia in those decisive years when the imperial power was waning and urban structures were in decay. The picture would be much fuller and more complete if it were complemented by coins from the western empire minted in both halves of the divided empire. Coins showing individual emperors, are fairly well represented in the period of Arcadius and Theodosius II, and then fall off rapidly but it would also be important to study the percentage of mints in both the West and East parts of the empire.

For the coins whose place of finding is recorded the author has used the relatively new Academy register for Croatia (KORENČIĆ, 1979) and for the finds from the former Srijem County the register of 1895 (Političko i uredbeno razdieljenje 1895).
