KINDERGARTEN INTERIOR ENVIRONMENT DESIGN BASED ON CHILDREN’S MENTAL SENSITIVITY AND PSYCHOLOGICAL BEHAVIOR

Lei Li
Qujing Normal University, 655011, Yunnan, China

With the development of science and culture, kindergarten has become the first place for children’s education. Their living and learning environment plays a very important role in children's physical and mental development. Kindergarten education is the beginning of formal education. From the perspective of design, the design of kindergarten is different from other types of environmental design. Environmental design is closely related to children's life and learning, and mainly focuses on the characteristics of physical and mental development in early childhood. However, the current interior design of kindergartens in China is somewhat unsatisfactory. For example, some designs cannot meet national standards. Some are of poor environmental quality, and some children's activities are not enough. In addition, different designers have different views on the interior design scheme of the kindergarten.

A STUDY ON THE INFLUENCE OF LITERARY APPRECIATION ON COLLEGE STUDENTS’ PERSONALITY AND TEMPERAMENT

Wei Liu
Yanching Institute of Technology, 065201, Langfang, Hebei, China

Literature appreciation plays a very important role in improving college students' temperament and cultivation. It helps college students establish lofty ideals and work tirelessly for them. It is helpful for college students to improve their personality, form a noble personality style, and improve their aesthetic ability. Bring literary appreciation into the scope of College Students’ quality education, and take literary appreciation as a new way to cultivate people's ability, improve people's realm and shape people's soul. It is of far-reaching significance to realize the great goal of cultivating high-quality talents for the new century. Students' appreciation of literary works has a direct effect on students' author's feelings. Therefore, in order to improve students' ability, teachers must broaden students' horizons and help students appreciate literary works properly.

THE INFLUENCE OF COLLEGE MUSIC EDUCATION ON STUDENTS’ EMOTIONAL EMPATHY AND MENTAL STRESS

Jianping Deng
Quzhou University, Quzhou, Zhejiang, 324000, China

With the rapid development of China's economy, the society has higher and higher requirements for talents, which requires students to have strong comprehensive quality, so as to make students better adapt to the needs of social development. As an important part of quality education, music education in Colleges and universities can not only promote students’ personalized development and personality improvement. At the same time, it can also comprehensively improve students' comprehensive quality, which is of great significance to their future study and development. In practical teaching, teachers can first set up Chinese traditional music education in the curriculum, and then infiltrate the world's advanced culture and ideas into music teaching on this basis. On the basis of highlighting the original concept of music education. So that students can objectively view the differences between Chinese and foreign music cultures, make students more diversified in music learning, and let students improve their comprehensive quality in different music edification.

A STUDY ON THE INFLUENCING FACTORS AND COUNTERMEASURES OF COLLEGE STUDENTS’ ENGLISH TRANSLATION ANXIETY

Tao Long
School of Foreign Languages and Cultures, Panzhihua University, Panzhihua, Sichuan, 617000, China

Serious exam anxiety makes students worried and uneasy at ordinary times. The problems that need to be solved are confused, unable to find a clue, and unable to think normally. This will affect the test results. Excessive test anxiety is a great threat to people's mental health. It narrows the scope of people's consciousness and makes the cognitive evaluation ability unable to play normally. It often reduces students' self-esteem and self-confidence and forms a strong sense of inferiority. Especially when the duration is long, it will not only endanger people's mental health, but also greatly endanger people's physical health. In this paper, test anxiety is an unpleasant emotional experience. Some students will be troubled by anxiety when taking the exam. Based on the results of the questionnaire survey, this paper makes a case analysis, summary and Reflection on the students with serious test anxiety. The study found the causes of test anxiety, and actively studied and discussed the countermeasures.

BIG DATA DRIVEN MENTAL HEALTH ASSESSMENT MODEL OF DEPRESSION OF COLLEGE STUDENTS

Li Yi1 & Sun Wei2
1School of Foreign Languages, Jining Normal University, 012000, Ulanqab, Inner Mongolia, China
2School of Computer and Big Data, Jining Normal University, 012000, Ulanqab, Inner Mongolia, China

The dynamic model of College Students' Depression Evaluation comprehensively and intelligently processes the psychological evaluation information based on big data technology. The depression is reflected in the form of dynamic curve "mental image map", showing the trend of psychological dynamic change and reflecting the track of psychological growth. In order to improve the accuracy of College Students' mental health assessment, this paper proposes a big data-driven college students' melancholy mental health assessment model. Firstly, the evaluation index system of College Students' depression is established, and the weight value of College Students' mental health evaluation index is determined by analytic hierarchy process. Finally, the fuzzy comprehensive algorithm is used to realize the mental health evaluation of college students through the maximum membership principle. The experimental results show that the model is more accurate in the evaluation of College Students' mental health and has a certain practical value.

ANALYSIS AND RESEARCH ON THE INFLUENCE OF CLASSICAL DANCE TRAINING ON FEMALE COLLEGE STUDENTS’ HEALTH, PHYSICAL FITNESS AND PERSONALITY QUALITY

Huaru Wang
Xianyang Normal University, 712099, Xianyang, Shaanxi, China

This paper analyzes the effect of sports dance on the physical quality of female college students. It has many social functions, such as fitness, entertainment, social networking, competitive performance and so on. It integrates fitness and spring heart. It is not restricted by the field equipment, and the exercise load is relatively small. Therefore, people of different ages, different physiques and different levels can participate. Through the methods of experiment and mathematical statistics, this paper studies the positive impact of sports dance special course on the physical health of female college students. Experimental
