

zatanosti i neznanja. Kaže Boka, ako nema uvažavanja kolega među sobom, ako nema poštovanja odozgo prema dolje, vladat će poniženja, samovolja, razularenost.

Slijede članci *Šezdeseta obljetnica mature đaka Geodetske srednje tehničke škole u Zagrebu, Znanstveno-stručno putovanje austrijskih inženjera prije 132 godine, Zašto šepam?*

U članku *Za kraj* spominje se Ivan Kukuljević-Sakcinski, samotnjak, kao organizator kulturno-povijesnog života u Zagrebu. Njegovi su govori većinom bili govori gluha, a plodove njegova rada uživaju današnje generacije. Inače, Ivan Kukuljević-Sakcinski poznat je po tome što je prvi održao govor na hrvatskom jeziku u Hrvatskom saboru 2. svibnja 1843. godine.

Iz navedenog rada citiram: „Ova je knjižica tek izvadak iz velikog djela koje nijedan čovjek ne može potpuno završiti za trajanja jednoga, ma kako marljivo provedenoga života. Ona je zapravo vapaj za spas izložaka i događaja i zemljomjerstva te mali doprinos spoznaji njihove povijesne i tehničke vrijednosti. Ono što ne poznamo ne možemo ni cijiniti“.

Na kraju, hvala prof. Božidaru Kanajetu na ovoj divnoj publikaciji, hvala mu što od 1978. godine pronalazi, skuplja, čuva (u geodetskoj muzejskoj zbirci Tehničkog muzeja, koju svakako trebate posjetiti) i piše o mnogim geodetskim, i ne samo geodetskim vrednotama. Plodove njegova rada uživat će mnoge generacije.

Svi vi koji budete čitali ovu publikaciju bit ćete obogaćeni novim spoznajama, novim pogledima. Ako ste nešto od toga i znali, sada će vam biti prikazano na drugačiji, Bokin način. Ne morate se s njim složiti, ne morate prihvatiti njegove argumenta, ali će vam, sasvim sigurno, dati razmišljati – da nešto može biti i drugačije. A to i jest, po mom mišljenju, bio Bokin cilj.

*Zdravko Kapović*

## IZ STRANIH ČASOPISA

### **Acta Geodaetica et Geophysica, Vol. 52, No. 2, 2017.**

- Thermo-mechanical controls on geothermal energy resources: case studies in the Pannonian Basin and other natural laboratories. Sierd Cloetingh, Jan-Diederik Van Wees, Viktor Wetztergom. 157-160.
- Lithospheric scale 3D thermal model of the Alpine-Pannonian transition zone. L. Lenkey, D. Raáb, G. Goetzl, A. Lapanje, A. Nádor, D. Rajver, Á. Rotár-Szalkai, J. Svasta, F. Zekiri. 161-182.
- The role of pargasitic amphibole in the formation of major geophysical discontinuities in the shallow upper mantle. István Kovács, László Lenkey, David. H. Green, Tamás Fancsik, György Falus, János Kiss, László Orosz, Jolán Angyal, Zsuzsanna Viktor. 183-204.
- Key results on deep electrical conductivity anomalies in the Pannonian Basin (PB), and their geodynamic aspects. A. Ádám, L. Szarka, A. Novák, V. Wetztergom. 205-228.
- Double-difference relocation of the 29 January 2011 ML 4.5 Oroszlány earthquake and its aftershocks and its relevance to the rheology of the lithosphere and geothermal prospectivity. Eszter Békési, Bálint Süle, László Lenkey, Ágnes Lenkey-Bógér, István Bondár. 229-242.
- High-resolution quantitative reconstruction of Late Cretaceous-Tertiary erosion in the West Netherlands Basin using multi-formation compaction trends and seismic data: implications for geothermal exploration. Geza Worum, Jan-Diederik van Wees. 243-268.
- A public domain model for 1D temperature and rheology construction in basement-sedimentary geothermal exploration: an application to the Spanish Central System and adjacent basins. J. Limberger, D. Bonte, G. de Vicente, F. Beekman, S. Cloetingh, J. D. van Wees. 269-282.

**Allgemeine Vermessungs-Nachrichten, Vol. 124, No. 5/2017.**

- Aggregation und Gewichtung von unterschiedlichen Wertermittlungsdaten in kaufpreisarmeren Lagen mittels Varianzkomponentenschätzung. Alexander Dorndorf, Matthias Soot, Alexandra Weitkamp, Hamza Alkhatib.
- Modellselektion mittels Akaike-Informationskriterium – Anwendung in der Kongruenzanalyse. Michael Lösler, Rüdiger Lehmann, Cornelia Eschelbach.
- Big Data – eine Technik, die Geodäten betrifft. Gerd Kehne.

**Geoinformatica, Vol. 21, No. 2, 2017.**

- Panda \*: A generic and scalable framework for predictive spatio-temporal queries. Abdel-tawab M. Hendawi, Mohamed Ali, Mohamed F. Mokbel. 175-208.
- Vague distance predicates. Thomas Bittner. 209-229.
- Design principles of a stream-based framework for mobility analysis. Loic Salmon, Cyril Ray. 237-261.
- Distributed processing of big mobility data as spatio-temporal data streams. Zdravko Galić, Emir Mešković, Dario Osmanović. 263-291.
- High performance location-based services in a main-memory database. Suprio Ray, Rolando Blanco, Anil K. Goel. 293-322.
- Implementing set operations over moving regions using the component moving region model. Mark McKenney, Rakeem Shelby, Sheetal Bagga. 323-350.
- Operations to support temporal coverage aggregates over moving regions. Mark McKenney, Roger Frye, Zachary Benchly, Logan Maughan. 351-364.
- Efficient online extraction of keywords for localized events in twitter. Hamed Abdelhaq, Michael Gertz, Ayser Armiti. 365-388.
- Online event recognition from moving vessel trajectories. Kostas Patroumpas, Elias Alevizos, Alexander Artikis, Marios Vodas, Nikos Pelekis, Yannis Theodoridis. 389-427.
