

IZ STRANIH ČASOPISA

Acta Geodaetica et Geophysica Hungarica, Vol.48, No.1., 2013.

- Eyewitnesses about the Tunguska cosmic body. O. G. Gladysheva. 1.-7.
- The results and works of the latest adjustment of Hungarian Gravimetric Network (MGH-2010). Géza Csapó, András Koppán. 9.-16.
- Quick imaging of MT data using an approximate inversion algorithm. M. Dobróka, E. Prácsér, E. Turai, R. Kavanda. 17.-25.
- Application of the constrained moving horizon estimation method for the ultra-short baseline attitude determination. Honglei Qin, Wantong Chen Pages. 27.-38.
- An investigation on accuracy of DGPS network-based positioning in mountainous regions, a case study in Alborz network. D. Nejat, R. Kiamehr. 39.-51.
- Integrated core study of a fractured metamorphic HC-reservoir; Kiskunhalas-NE, Pannonian Basin. Ágnes Nagy, Tivadar M. Tóth, Balázs Vásárhelyi. 53.-75.
- A laboratory method for determining the dissipated energy. Á. Deli, M. Gálos, B. Vásárhelyi. 77.-86.
- Shear-wave velocity structure of the northern part of the Iberian Peninsula from Rayleigh-wave dispersion analysis. V. Corchete, M. Chourak. 87.-107.

Allgemeine Vermessungs-Nachrichten, Vol.120, No.4., 2013.

- Unsicherheit der Bewegungsdetektion aus Koordinatendifferenzen. Andreas Wieser.
- Aktives Prisma für tachymetrische Netzmessungen. Sebastian Horst, Ilka von Gösseln.
- Zur Abstimmung der Signifikanzniveaus von Global- und Einzeltest. Christian Marx.
- Die Anwendung der Ähnlichkeitstheorie zur Bestimmung von Refraktionskorrekturen beim Nivellement. O. A. Mozhukhin.
- GNSS-Information.

Geoinformatica, Vol.17, No.2., 2013.

- Directional relations and frames of reference. Eliseo Clementini. 235.-255.
- A framework to model and manipulate constraints for over-constrained geographic applications. Wassim Jaziri, Michel Mainguenaud. 257.-284.
- Footprint generation using fuzzy-neighborhood clustering. Jonathon K. Parker, Joni A. Downs. 285.-299.
- Multi-level representation of terrain features on a contour map. Eric Guilbert. 301.-324.
- STHist-C: a highly accurate cluster-based histogram for two and three dimensional geographic data points. Hai Thanh Mai, Jaeho Kim, Yohan J. Roh, Myoung Ho Kim Pages. 325.-352.
- Evolutionary search for understanding movement dynamics on mixed networks. William M. Spears, Steven D. Prager. 353.-385.
- Spatio-temporal polygonal clustering with space and time as first-class citizens. Deepti Joshi, Ashok Samal, Leen-Kiat Soh. 387.-412.

Geomatics Info Magazine (GIM International), Vol.27, No.4., 2013.

- UAS as a Tool for Surveyors: From Tripods and Trucks to Virtual Surveying. Tom Op 't Eyndt and Walter Volkmann.

- Piloting the Social Tenure Domain Model in Uganda: Innovative Pro-poor Land Tools under Implementation. Danilo Antonio, Jack Makau and Samuel Mabala.
- A Milestone in Standardisation: New Augmented Reality Standard. Christine Perey, Martin Lechner and Blair MacIntyre.

Journal of Geodesy, Vol. 87, No.4., 2013.

- Recursive computation of oblate spheroidal harmonics of the second kind and their first-, second-, and third-order derivatives. Toshio Fukushima. 303.-309.
- Devising stable geometrical reference frames for use in geodetic studies of vertical crustal motion. Michael Bevis, Abel Brown, Eric Kendrick. 311.-321.
- On the theoretical link between LLL-reduction and Lambda-decorrelation. A. Lannes. 323.-335.
- A continuous velocity field for Norway. Halfdan Pascal Kierulf, Mohammed Ouassou, Matthew James Ross Simpson. 337.-349.
- Fast error analysis of continuous GNSS observations with missing data. M. S. Bos, R. M. S. Fernandes, S. D. P. Williams, L. Bastos. 351.-360.
- High-rate precise point positioning (PPP) to measure seismic wave motions: an experimental comparison of GPS PPP with inertial measurement units. Peiliang Xu, Chuang Shi, Rongxin Fang, Jingnan Liu, Xiaoji Niu. 361.-372.
- On the formulation of the alternative hypothesis for geodetic outlier detection. Rüdiger Lehmann. 373.-386.
- Bias in GRACE estimates of ice mass change due to accompanying sea-level change. M. G. Sterenborg, E. Morrow, J. X. Mitrovica. 387.-392.
- Sub-daily noise in horizontal GPS kinematic time series due to thermal tilt of GPS monuments. Hiroshi Munekane. 393.-401.
- IAG Newsletter. Gyula Tóth. 403.-404.

Survey Review, Vol.45, No. 329(1), 2013.

- ZigBee network positioning with support of Real-Time Kinematic GPS and terrestrial measurements. Mok, E; Yeung, Y K. 81.-87.
- Real time dynamic precise point positioning with mixture filtering. Nie, J L; Wu, F M; Guo, C X; Cheng, C L; Liu, H; Jiang, G W; Wang, B. 88.-91.
- Iteratively reweighted total least squares: a robust estimation in errors-in-variables models. ahboub, V; Amiri-Simkooei, A R; Sharifi, M A. 92.-99.
- The land administration domain model (LADM) as the reference model for the Cyprus land information system (CLIS). Elia, E A; Zevenbergen, J A; Lemmen, C H J; van Oosterom, P J M. 100.-110.
- Research on least squares adjustment of high precision network of triangulation. Chen, B F; Yue1, J P; Shi, K. 111.-116.
- Statistical testing of directions observations independence. Kregar, K; Turk, G; Kogoj, D. 117.-125.
- Evolution of land registration and cadastral survey systems in Sri Lanka. Divithure, H; Tang, C. 126.-135.
- Metaheuristic optimisation approach for designing reliable and robust geodetic networks. Yetkin, M. 136.-140.
- Studies on renovation of cadastral sheets for urbanisation. Yalcin1, G; Bol, A; Eski, C. 141.-154.
