GIM Int'l Interviews Zdenko Kurtovic, CEO of Geo Astor

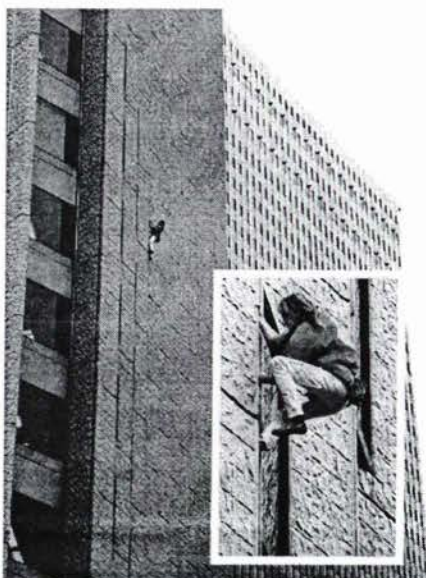

A Common Platform for Different GPS-es and Total Stations

We met Mr Kurtovic last September at Intergeo, the trade show in Wiesbaden Germany, where he ran what might be called the smallest mobile booth one could imagine. He walked around the exhibition floor with a new piece of RTK-GPS equipment that for the most part was hidden in a slender belt around his waist: a remarkable product and a ditto personality representing a small Swiss company called Geo Astor.

Zdenko Kurtovic

GIM, veljača 1999.

TOKYO, 6. studenoga - Lucidni francuski penjač i profesionalni alpinist Alan Robert, poznatiji kao Spiderman (čovjek pauk), popeo se na 232 metra visoku zgradu Shinjuku centra u Tokiju. Uhačim je čim je stupio na vrh i to zbog narušavanja privatnog posjeda.
