Edukacija iz javnog zdravstva

Luka Kovačić

Objavljena je knjiga za javno zdravstvo „Management in Health Care Practice“

Prilikom Dana Škole narodnog zdravlja „A. Štampar“ Medicinskog fakulteta 2008. godine prikazana je 5. knjiga nastavnih modula za nastavnike koji sudjeluju u nastavi iz područja javnozdravstvenih sadržaja pod naslovom „**Management in Health Care Practice**“. O tome sam kratko obavijestio u listopadskom broju našeg časopisa, a sad o knjizi pišem malo detaljnije, kako bi bolje upoznao naše nastavnike, i druge stručnjake, te studente javnog zdravstva s mogućnošću korištenja ove literature.

Knjiga je pisana u vidu priručnika, namijenjena je u prvom redu nastavnicima poslijediplomskih (magistarskih i doktorskih) studija iz područja organizacije i menadžmenta u javnom zdravstvu, epidemiologiji, ekologiji i drugim srodnim javnozdravstvenim područjima. Tiskana je na engleskom jeziku u 200 primjeraka, koji su distribuirani knjižnicama, te zainteresiranim nastavnicima. Sredstva za tiskanje ove knjige osigurao je MetaNet projekt financiran od DAAD iz Njemačke. No svi su sadržaji dostupni na web stranicama Škole (<http://www.snz.hr/ph-see>). Priloge je napisalo 49 autora iz 10 zemalja, pretežno Jugoistočne Evrope. Sadržaj knjige podijeljen je u 5 poglavlja:
