<b>Crush Syndrome in Earthquakes – Stay and Play or Load and Go?</b> Iskra Alexandra Nola, Matija Dvorski, Mirza Žižak and Tomislav Kuliš	158

## PREAMBLE

The 14<sup>th</sup> Urological Days in Osijek and the 6<sup>th</sup> Croatian Section of Croatian Urology Nurses and Technicians were held on May 12-14, 2022. It was a three-day symposium that, in accordance with tradition, was of an international character.

The organizers of this meeting were the Institute of Urology, Osijek University Hospital Center; Reference Center of the Ministry of Health for Urolithiasis; Faculty of Medicine in Osijek; Croatian Medical Association-Osijek Branch; Croatian Urological Society; Croatian Andrological Society; Croatian Society for Urological Oncology; Reference Center of the Ministry of Health for Urological Oncology; and Pro Futuro Association in Osijek, all within the framework of the EU project entitled Center for Education, Early Detection and Prevention of Neoplastic Diseases in Osijek-Baranja County.

The main topics of the meeting were Kidney Transplantation, Robotics and Laparoscopy in Urology, Andrology, Urological Oncology and Urolithiasis, as well as prevention and early detection of malignant diseases through an interdisciplinary approach.

Malignant diseases in young men are often a taboo topic and therefore special emphasis is placed on early detection and prevention of malignant diseases of the male reproductive system through an interdisciplinary approach. In the clinical and scientific section, current events and new knowledge were presented, as well as examples of cases that urological practitioners encounter in their daily work.

We especially thank the authors who prepared in extenso papers for this supplement, and it is with great pleasure that I present 24 complete papers that are available to readers around the world in the open access journal Acta Clinica Croatica.

Dear colleagues, we look forward to welcome you at our next meeting.

*Oliver Pavlović, MD, PhD*

*Professor Tvrтко Hudolin, MD, PhD*

*Professor Ivoica Mihaljević, MD, PhD*
