

Foreword

In this year's issue of *Ethnological Research*, the Ethnographic Museum published six scientific and professional papers by authors in the field of ethnology / cultural anthropology and museology who presented the results of their research in different areas of their work. This issue contains the papers of experts from the Ethnographic Museum, the Ministry of Culture and Media of the Republic of Croatia, as well as authors from all over Croatia and abroad. In the second part of *Ethnological Research 28*, exhibition presentations, virtual editions, museum activities and educational programs of the Ethnographic Museum, as well as presentations of books by experts outside the museum were published.

Considering that in 2024 the magazine is celebrating the ninetieth anniversary of the first issue, we invite all authors to join us with their contributions to the next issue, which will be thematically dedicated to contemporary and current topics related to ethnographic museums and changes, i.e., transformations of museum institutions through a new work methodology which primarily refers to cooperation with the community, organizational changes within institutions, challenges of rethinking and new concepts of ethnographic museums in terms of accessibility and cultural participation through transformation through storytelling and interpretation of museum collections.
