

The Journal “Cartography and Geoinformation” in European Scientific Libraries

Indexation in popular bibliographic and citation databases and the frequency of citations of published papers are the main indicators nowadays of the visibility and impact of a scientific journal. Stojanovski et al. (2015) in their paper investigated the visibility of 112 geodetic journals, including the journal *Cartography and Geoinformation*, based on their indexation in appropriate thematic and most popular multidisciplinary databases.

While searching the Internet, we often found that the online catalogues of some European university libraries, or libraries of scientific institutes, offer their readers quick access to complete texts published in the Croatian cartographic journal *Cartography and Geoinformation* (ISSN 1333-896X Print, ISSN 1848-0713 Online). On 15 and 16 September 2021, we searched ten online library catalogues. It should be emphasized that searching provides bibliographic data of published texts with links to the journal's website where complete texts are available. Below are the titles of ten online catalogues, in parentheses the number of titles found and a link to the catalogue website. Apart from the ISSN, the search can be done, for example, using the first and last name of the scientist or by keywords.

- Bodleian Libraries, University of Oxford (1578 titles) https://solo.bodleian.ox.ac.uk/primo-explore/search?vid=SOLO&lang=en_US&sortby=rank
- BA Sachsen – Library (809 titles) <https://katalog.ba-sachsen.de>
- Biblioteca de la Universidad de Oviedo (BUO). (782 titles) <https://buo.uniovi.es>
- CORE – Max Planck Institute for Research on Collective Goods, Library, (780 titles) <http://core.coll.mpg.de>
- EBSCO Stacks (782 titles) <https://academic.stacksdiscovery.com>
- Explore the British Library – Explore Further, (1545 titles), http://explore.bl.uk/primo_library/libweb/action/search.do?mode=Basic&vid=BLVU1&tab=primo_central&
- Hochschule für Bildende Künste Dresden, (756 titles), <https://katalog.hfbk-dresden.de>
- SLUB – Wir führen Wissen (809 titles), <https://blog.slub-dresden.de/beitrag/2016/02/09/wir-fuehren-wissen-mit-europaeischer-marke-fuer-weltoffene-forschung>
- University of Westminster, Library Search, (1534 titles), https://library-collections-search.westminster.ac.uk/discovery/search?vid=44WST_INST:WST_VUA
- Westsächsische Hochschule Zwickau, University of Applied Sciences

(809 titles) <https://www.katalog.fh-zwickau.de>

Large differences in the number of titles found, from 756 to 1578, are the result of different ways of citing. Since *Cartography and Geoinformation* publishes all texts in Croatian and English, libraries citing bibliographic data for 756, 780, 782 and 809 papers cited the title for each paper in English only or in Croatian and English, while libraries with 1534, 1545 and 1578 papers listed each paper twice: separately in Croatian and separately in English.

Such a large representation of the journal *Cartography and Geoinformation* in ten European scientific libraries is the result of an open approach in which the journal publishes and excellent websites (<https://doi.org/10.32909/kg>). On these websites, not only articles, but also all other attachments can be found in separate PDFs. Congratulations to the editors.

Časopis Kartografija i geoinformacije u europskim znanstvenim knjižnicama

Indeksiranost u popularnim bibliografskim i citatnim bazama podataka i učestalost citiranja objavljenih radova danas su glavni pokazatelji koji upućuju na vidljivost i utjecaj znanstvenog časopisa. U radu Stojanovski i dr. (2015) istraženo je kakva je vidljivost 112 geodetskih časopisa, među njima i časopisa Kartografija i geoinformacije, temeljena na njihovoj indeksiranosti u odgovarajućim tematskim i najpopularnijim višedisciplinarnim bazama podataka.

Pretražujući internet često smo naišli da i mrežni katalozi nekih europskih sveučilišnih knjižnica, ili knjižnica znanstvenih instituta, nude svojim čitateljima brzi pristup do cjelovitih tekstova objavljenih u hrvatskom kartografskom časopisu Kartografija i geoinformacije (ISSN 1333-896X Print, ISSN 1848-0713 Online). Pretraživali smo 15. i 16. rujna 2021. devet mrežnih kataloga knjižnica. Važno je naglasiti da se pretražujući dobivaju bibliografski podatci objavljenih tekstova s poveznicama na mrežne stranice časopisa gdje su dostupni cjeloviti tekstovi. U nastavku navodimo naslove deset mrežnih kataloga, u zagradi broj pronađenih naslova i poveznicu na mrežne stranice kataloga. Osim po ISSN-u može se pretraživati i npr. prema imenu i prezimenu znanstvenika ili ključnim riječima.

- Bodleian Libraries, University of Oxford (1578 naslova) https://solo.bodleian.ox.ac.uk/prim-explore/search?vid=SOLO&lang=en_US&sortBy=rank
- BA Sachsen – Library (809 naslova) <https://katalog.ba-sachsen.de>
- Biblioteca de la Universidad de Oviedo (BUO). (782 naslova) <https://buo.uniovi.es>

- CORE – Max Planck Institute for Research on Collective Goods, Library, (780 naslova) <http://core.coll.mpg.de>
- EBSCO Stacks (782 naslova) <https://academic.stacksdiscovery.com>
- Explore the British Library – Explore Further, (1545 naslova), <http://explore.bl.uk/prim-explore/libweb/action/search.do?mode=Basic&vid=BLVU1&tab=prim-central&>
- Hochschule für Bildende Künste Dresden, (756 naslova), <https://katalog.hfbk-dresden.de>
- SLUB – Wir führen Wissen (809 naslova), <https://blog.slub-dresden.de/beitrag/2016/02/09/wir-fuehren-wissen-mit-europaeischer-marke-fuer-weltoffene-forschung>
- University of Westminster, Library Search, (1534 naslova), https://library-collections-search.westminster.ac.uk/discovery/search?vid=44WST_INST:WST_VUA
- Westsächsische Hochschule Zwickau, University of Applied Sciences

(809 naslova) <https://www.katalog.fh-zwickau.de>

Velike razlike u broju pronađenih naslova, od 756 do 1578, rezultat su različitog načina citiranja. Budući da Kartografija i geoinformacije objavljuje sve tekstove na hrvatskom i engleskom, knjižnice koje navode bibliografske podatke za 756, 780, 782 i 809 radova navele su za svaki rad naslov samo na engleskom ili na hrvatskom i engleskom, a knjižnice s 1534, 1545 i 1578 radova navele su svaki rad dva puta: posebno na hrvatskom i posebno na engleskom jeziku.

Tako velika zastupljenost časopisa Kartografija i geoinformacije u deset europskih znanstvenih knjižnica rezultat je otvorenog pristupa u kojem časopis objavljuje i izvrsnih mrežnih stranica (<https://doi.org/10.32909/kg>). Na tim mrežnim stranicama, ne samo članci, već i svi ostali prilozi nalaze se u zasebnim PDF-ovima. Čestitke uredništvu.
