Izvorni znanstveni rad

*U razdoblju izm.edu 1931. i 1933. god. postupno je otkupljivani dio poklanjan dio veće ostave od oko 5000 najrazličitijih primjeraka evropskog novca, nade njih u selu Pribojska Goleša god. 1930. Autor daje pregled 2407 komada novca koji se čuvaju u numizmatičkoj zbirci Arheološkog muzeja u Zagrebu: artiluka, groša (dinara), grösica (dinarica), douzains, carlina, luigina, leeuwendaal-dera, orta, denara, silinga, itd., kovanih od druge polovice 15. St., pa sve do 1666. god.*

Prema oskudnim podacima kojima danas raspolazemo, godine 1930. seljaci su uz potok u selu Pribojska Goleša, u nekadašnjem Sandžaku (specijalna karta MJ. 1:50.000, list 121/3 - Vardiste; 19° 30' ist.s., 43° 30' sj. d.) iskopali posudu s oko 5000 komada srebrnog novca (Klemenc J. 1936: 129-130; Mirnik, I. 1981: 141, br. 686). Dio ove značajne ostave raspršen je, dok je veći dio dospio u Zagreb u numizmatičku zbirku tadašnjeg Arheološko-historičkog narodnog muzeja. Novae iz tog nalaza pristizao je postupno: god. 1931. je 441 komad prodao Milan Nestorović iz same Pribojske Goleše za svotu od 1000 dinara (spis br. 70a/1931 od 9.II.1931); zatim je Vjekoslav Horvat iz Zagreba prodao muzeju daljnjih 177 komada, također za 1000 dinara (spis br. 78/1931 od 10.11. 1931). Najviše je pak novca iz Goleša otkupljeno od poznatog zagrebackog sakupljaca Matije Ivanca - 1000 ugarskih srebrnih denara skupa s još drugih 500 srebrnika, ove potonje po 2 dinara po komadu, godine 1931. (spis br. 193/1931 od 29.III.1931), a ponesto dubrovackog i poljskog novca 1932. god. (spis br. 15/1932.) i 1933. (spisi br. 697/1933 od 22.IX. i br. 768/1933 od 4.X.1933) Za malo manju količinu je tako 1933 god. primio iznos od 1343. dinara. Daljnje je primjerke iz spomenute ostave muzeju poklonila nepoznata nam osoba 1931. god. a nešto je muzeju prodao i George Washington Nuber, sin poznatog osječkog numizmatičara i sakupljača Karla Franza Nubera (1872-1935), ali bez podataka o toenom porijeklu srebrnika.

Josip Klemenc (1898-1967) je odmah uočio vrijednost goleškog blaga i dao se na mukotrpan posao koji je iziskivala njegova obrada. Novae je očišćen, djelomice izmjeran i izvagan, te inventiran u inventarsku knjigu novca iz srednjeg i novog vijeka. Novcu pripadajuće ceduljice ispisane su krasopisom, ili su tiskane radi uštede na vremenu jer toliki je broj primjeraka. Kasnije, kako nije bilo mogućnosti za objavu, mate-

rijal je spakovan u male kuverte, koje su izvana detaljno označene, a one su, prema zastupljenim zemljama, svezane uzicom. Dio rjedeg materijala raspoređen je po sistematskoj zbirci. Godine 1936. J. Klemenc objavio je sumarni popis goleške ostave (Klemenc, J. 1936: 129-130) iz kojeg se vidi da je u muzej prispjelo 3297 primjeraka novca. Nakon provedene detaljne revizije skupnog nalaza primijećene su stanovite razlike između današnjeg stanja kakvo je zatečeno i onog koje je predložio Klemenc. Pojedinačno inventirani novci ne samo da su svi bili na broju i odgovarali prvotnom popisu nego ih je zapravo bilo i više, jer su se pri inventiranju tog obimnog materijala Klemencu potkrale greske, tako da je zabunom dva ili više sličnih primjeraka novca stavio pod isti inventarski broj, te je to naknadno ispravljeno. Manje, neznatne razlike javljaju se također kad je riječ o novcu nekih vladara, koji je poradi slabijeg stanja očuvanosti krivo atribuiran, ili je godina emisije krivo procitana. Na dva mjesta javljaju se značajne razlike - tako primjerice, trebalo je biti 249 dužena Ljudevita XIII, a imade ih svega 9 (možda je tu riječ o tiskarskoj gresci), a na sličan se način do danas nije u zbirci moglo pronaći oko 800 dubrovačkih grosica ili dinarica, na kojima se nije mogla pročitati godina kovanja. Prema tome za sad možemo dati pregled 2407 primjeraka novca iz Goleše.

Vremenski raspon goleške ostave seže od druge polovice 15. st. - to su denari poljskog kralja Kazimira IV Jagelovića (1444-1492) - do 1666. god. koju nose duženi Guillaume Henrija, vojvode Oranije (1650-1702). I u nama poznatim skupnim nalazima novca iz Bosne i Srdinca najstariji je dio predstavljao novac Kazimira IV. U blagu o kojem je riječ imade i ponešto novca iz 16. st. To su npr. sleski svidnički polugroši hrvatsko-ugarsko-ceskoga kralja Ljudevita II (1516-1526), već podosta izlizani od dugo vremena opticaja.

Svidnički su polugroši bili zastupljeni i u ostavama iz Bosne, Slavonske Požege, Srdinca i Valpova, te u tim cjelinama, također iz 17. str., pokazuju i stariji dio valute u opticaju. Šesnaesto stoljeće zastupa i ponešto poljskog, braniborsko-pruskog, ugarskog i dubrovačkog novca. Najmlađi novac goleške ostave pokazuje tragove opticaja, pa je prema tome J. Klemenc smatrao da je blago zakopano oko 1670., god. te da je njegov nekadašnji vlasnik bio neki strani trgovac koji je putovao po Otomanskom Carstvu (Klemenc, J. 1936:130). Nema razloga da posumnjamo u to prosuđivanje.

Sastav blaga vrlo je zanimljiv i svojom raznolikošću tipičan za 17. str. Od južnoslavenskih kovova su podosta zastupljeni dubrovački: 3 artiluka, 17 groša i 324 grošića, djelomice probušeni, te 8 dubrovačkih patvorina groša Sigismunda III iz grada Rige (i artiluci na reversu oponašaju poljske trogoše). Ove patvorine, koje nose oznake 1591, 1592, 1596 i 1599. godine Rešetar datira nakon 1667. (Rešetar, M. 1924: 504-505; Rešetar, M. 1925: 352, br. 3626-3629, cf. također: Mikolajczyk, A. 1988: 134, 144, 147, 148). Svi zagrebački primjerci, za koje se može pretpostaviti da potječu iz Goleše, nisu dugo bili u opticaju, tek su svi odreda probušeni i površno kovani. Dosad se znade samo da su slični primjerci bili zakopani s ostalim novcem u blagu 17. st. iz Mirasa iz 1957. god.

Dubrovački dinarići, odnosno grošići vrlo su česti u zakopanima ostavama iz 17. st. iz naših krajeva osobito onima s područja nekadašnjeg Otomanskog Carstva, i brojčano su značajna komponenta - tako npr. u skupnim nalazima iz Bosne, Delibašinog Sela, Dobričeva, Derdapa, Iriga, Kordusevaca, Kukujevaca, Lokvičića, Mokrog, Orahovice, Petrijevaca, Popovića, Valpova, Virovitice, Visokog i Zubaca. Dio dubrovačkih srebrnika busen je i služio je kao ukras na odjeći.

sveukupno

Francuski duženi također nisu iznimka među novcem u opticaju u Otomanskom Carstvu u 17. st. Bilo ih je u ostavama iz Derdapa, Komletinaca, Kotline, Mirasa, Orahovice, Oriovca, Pečana, Sremske Mitrovice i Virovitice. Tri primjerka iz Goleše nose arapske kontramärke, koje svjedoče o njihovom dalekom putu po Istoku. Novac Dombesa i Oranije naden je još i u blagu iz Grgura kraj Prokuplja, a lužini Monaka u onom iz Orahovice. Umjesto uobičajenih mletačkih nominala u zlatu i srebru u goleskom blagu nalazimo nekoliko vrlo rijetkih talijanskih kovova.

Novac nadvojvode Alberta i Izabele, namjesnika Španjolske Nizozemske, također nije rijetkost u 17. str., jer su dosad identificirani u Derdapu, Itebeju, Novom Slankamenu, Oriovcu i Sremskoj Mitrovici, a isto tako i srebrnici Filipa IV u Kotlini, Orahovici, Oriovcu i Sremskoj Mitrovici (španjolskog novca Filipa III i Filipa IV bilo je u ostavama iz Čitluka, Oriovca, Sente, Sremske Mitrovice, i Starog Majdana). Taliri i njihove frakcije kovani u pokrajinama i gradovima Nizozemske konfederacije zabilježeni su u skupnim nalazima iz Kotline, Mirasa, Oriovca, Velike Kruse i Virovitice, a nadeni ih je i pojedinačno.

U sastavu goleškog nalaza bilo je za nešto njemačkog novca Pruske kao poljskog lena za Sigismunda I, kao i Albrehta Braniborskog i Georga Wilhelma (kojega su sre-

brnici također registrirani u skupnim nalazima novca iz Derdapa, Kotline, Slavonske Požege i Valpova).

Važan dio skupnog nalaza o kojem je riječ poljski su groši i trogroši (u koje ubrajamo i novae Litve, Gdanska i Rige) kovani od vladavine kralja Kazimira IV Jagelovića (1444-1492) do Sigismunda III Wase (1587-1632), zastupljeni u više od devedeset ostava s područja balkana (Mikolajczyk, A. 1982; MikoZajczyk, A. 1986).

U Arheološkom muzeju u Zagrebu čuva se 1297 ugarskih denara iz Goleše, iz razdoblja između vladavina Ferdinanda I (1526-1564) i Ferdinanda III (1637-1657) - od toga su tri suvremene bakrene patvorine - kao i 76 sedmogradskih groša i denara vojvoda Stjepana Bocskaja, Gabriela Bathorija i Gabriela Bethlena. Takvog je novca bilo u još nekoliko blaga iz naših krajeva (Bosna c. 1879; Irig 1900; Itebej 1949; Mostar c. 1912; Ritopek 1956; Senta c. 1921; SI. Požega 1909; Srdinac 1908; Suhopolje 1916; Svetozar Miletić c. 1969; Trstenik; Valpovo 1897; Virovitica 1974; Visoko 1905).

Naposljetku valja upozoriti na relativno veliki postotak probušenih srebrnika. U sačuvanom dijelu ostave oni sačinjavaju 9,43%, s time da je najviše probušenih među dubrovacima (20,18%), poljskim (35,94%) i sedmogradskim (48,68%) novcem. Dubrovački falsifikati groša grada Rige su svi probušeni. Francuski douzains bušeni su samo u manjoj mjeri (3,45%).

SUMMARY  
ON THE 15-17 C. SILVER COIN HOARD FROM PRIBOJSKA GOLEŠA

Sparse reliable data allow us to establish that in 1930 peasants undug up a pot full of coins close to a stream at Pribojska Goleša in the Sanjak (Klemenc, J. 1936: 129-130; Mirnik, I. 1981: 141). This significant treasure was in part dispersed and in part reached the numismatic collection of the Archaeological Museum in Zagreb between 1931 and 1933. Several coins were presented by an anonymous donor, the rest were purchased from Milan Nestorović from Goleša, Vjekoslav Horvat and Matija Ivanac from Zagreb and from George Washington Nuber from Osijek. At the museum Josip Klemenc began to study the hoard. He had the coins cleaned, weighed and measured some of them and catalogued them in the inventory of Mediaeval and Modern coins. Most of the coins were later packed into small envelopes and laid aside. A detailed revision of the entire material has recently been undertaken and shown certain discrepancies between the list of the hoard published by Klemenc (Klemenc, J. 1936: 129-130) and the actual situation. All catalogued coins were there, but also more, because a number of errors were made by Klemenc who accidentally on a few occasions gave the same number to several coins. This has been corrected. There are also some minor differences among coins of various kings, which being not too well preserved, were wrongly attributed. The only two major discrepancies appeared among the douzains of Louis XIII of France - according to the original publication there should be 249 (possibly this was a misprint) but only 9 appear in the catalogue. There should be ca. 800 Ragusan grossetti with illegible years, but these have so far not been found in the collection. Thus a list of 2407 coins from the Goleša hoard can be given.

The chronological span within the hoard covers the period between the second half of 15 c. (denars of the Polish king Casimir IV Jagiello) and the year 1666 (douzain of Guillaume Henri of Orange). The coins of Casimir IV were the oldest in the hoards found in Bosnia and Srdinac as well. At Goleša there are also some 16 c. coins: Silesian half grossi of Ludovic II, some coins of Poland, Prussia, Hungary and Dubrovnik. The last coin to be recorded from the Goleša hoard is slightly worn, so Klemenc thought the hoard to have been concealed around 1670 and that its former owner was a foreign merchant travelling through those parts. There is no reason to doubt this.

The contents of the hoard are very interesting and typical for the period because of the variety of coins present. Among the issues of the Southern Slavonic states there are 3 artilucchi, 17 grossi and 324 grossetti minted in Dubrovnik, as well as 8 Ragusan imitations of grossi of Riga under Sigismund III Wasa (the Ragusan artilucchi too on their reverse imitated the Polish grossi). Such imitations bearing the years 1591, 1592, 1596 and 1599 were dated to a period after 1667 by M. Resetar (Resetar, M. 1924: 504-505; Resetar, M. 1925: 352, Nos. 3626-3629; cf. as well Mikolajczyk, A. 1988: 134, 144, 147, 148). None of the specimens in Zagreb could have been long in circulation, they are only superficially struck and all are pierced. Until now fakes of this kind are known only as part of the 17 c. Miraš hoard discovered in 1957.

The Dubrovnik grossetti are frequent in various hoards in Yugoslavia, from regions that used to be under Ottoman rule in 17c. In numbers they are usually a significant component of those hoards, though not in weight as they are usually thin and carelessly struck. Thus they have been found in Bosnia, Delibašino Selo, DobriČevo, -

Berdap, Irig, Korduševci, Kukujevci, Lokvičić, Mokro, Orahovica, Petrijevc, Popović, Valpovo, Virovitica, Visoko and Zupci. It was usual for Ragusan grossetti to be pierced and worn as ornaments on clothes.

French douzains too are no exception in coin hoards from the former provinces of the Ottoman Empire of the 17 c. They were registered in the following hoards: Derdap, Komletinci, Kotlina, Miras, Orahovica, Oriovac, Pečane, Srijemska Mitrovica and Virovitica. Three of the douzains from Goleša have an Arabic countermark which bears witness to their long journey through the East. Coins of Dombes and Orange were also found at Grgure nr. Prokuplje and luigini of Monaco at Orahovica. At Goleša there are some rare Italian issues instead of the usual Venetian gold and silver coins.

Coins of Archduke Albert and Isabella, the governors of the Spanish Netherlands are no exception either in the 17 c, as they were identified in the hoards found at Derdap, Itebej, Novi Slankamen, Oriovac and Srijemska Mitrovica; silver coins of Philip IV at Kotlina, Orahovica, Oriovac and Srijemska Mitrovica (real Spanish issues of Philip III and Philip IV were recorded at Čitluk, Oriovac, Senta, Srijemska Mitrovica and Stari Majdan). Talers and their fractions minted in the provinces and towns of the Netherlands are known to have been found at Kotlina, Miras, Oriovac, Velika Kruša and Virovitica; they can also be found casually.

There were some German coins of Prussia as Polish fief under Sigismund I as well as coins of Albert of Brandenburg and Georg Wilhelm (whose silver strikes were also dug up at Derdap, Kotlina, Slavonska Požega and Valpovo).

An important part of the Goleša hoard consists of coins of Poland (including Lithuanian coins as well as those of Gdansk and Riga), issued between the reigns of Casimir IV Jagiello (1444-1492) and Sigismund III Wasa (1587-1632). Such grossi and triple grossi were present in more than 90 hoards in the Balkans (Mikolajczyk, A. 1982; Mikolajczyk, A. 1986.)

There are 1297 Hungarian denars in the part of the Goleša hoard kept in the Archaeological Museum in Zagreb, dating from the period between the reigns of Ferdinand I (1526-1564) and Ferdinand III (1637-1657) - three of them are contemporary forgeries - as well as 76 Transylvanian denars and grossi of Stephen Bocskai, Gabriel Bathori and Gabriel Bethlen. Similar coins formed part of several more hoards from Yugoslavia (Bosnia, c.1879; Irig 1900; Itebej 1949; Mostar c. 1912; Ritopek 1956; Senta c. 1921; Slavonska Požega 1909; Srdinac 1908; Suhopolje 1916; Svetozar Miletić c. 1969; Trstenik; Valpovo 1897; Virovitica 1974; Visoko 1905).

Finally one must point out that a relatively high percentage of the coins in the aforesaid hoard are pierced. In the hoard as it now exists 9.43% coins are pierced: most of these are among the Ragusan grossetti (20.18%), Polish (35,94%) and Transylvanian (48.68%) issues. Ragusan imitations of Polish grossi are all pierced, but the French douzains only on a lesser scale (3.45%).
